Regarding: Water Master problem

Mr. Tuthill:

As of yesterday (June 6-95) approximately 2cfs. of water is going to the river and I am relifting this back to my farm to satisfy my water requirements. Who should I look to for recovery of this water to save the cost of lifting it 700-800 feet to get it back to my farm?

Timber Creek Watermaster (Mary Blackstock) identifies that I have a right for .6cfs. plus my stored water. She is overlooking the fact that I have a right for at least 55 cfs. free flow plus the .6cfs and the stored water.

Could I hear from you immediately as to how this water recovery can take place?

My telephone number is 208-834-2738 or fax number 208-495-2537 which is this Title at Murphy, Idaho.

Thanks:

Jay Hulet

I discussed this w/ Mr. Hulet telephonically on or about June 15. I advised him that we were in the process of renewing the M.d. order to ensure that adequate # controls are provided to the watermaster.
Jay
