\* = Data may not provide a valid measure of conditions. If the Basin wide percent of average value is flagged as potentially invalid, care should be taken to evaluate if the value is representative of conditions in the basin.

\*\* = April 1 is average as to when seasonal maximum snow water equivalent occurs each year. See complete Percent of Peak Report for specific dates. This column is from Percent of Peak Report which is manually run several times each week.

The SNOW WATER EQUIVALENT Percent of Average represents the snow water equivalent found at selected SNOTEL sites in or near the basin compared to the average value for those sites on this day.

For assistance contact the Idaho Snow Survey staff, 208-378-5740.  
 Reference period for average conditions is 1971-2000
