April 1, 1996

Water District: 47-G, Salmon Falls Creek

Dear Mr. Runyon;

We have received your 1995 watermaster's report, and your oath of office, proposed budget, and call-on petition for 1996.

Although I am again having trouble understanding your report, your 1996 certificate of appointment is enclosed. Apparently you are showing the total delivery cost the same as the adopted budget, \$194.30. Only about half of this amount goes to you, and I cannot tell what the rest of the money is to be used for. Apparently it goes into the District bank account.

Although there is no mention of a debit from previous years for David Breen, I note that he paid \$10.90 instead of the minimum \$5. charge; no delivery amount is shown for him, however, so I assume that he only owes \$5. So he would appear to have a credit of \$5.90, but no credit is shown. I asked this same question of the previous watermaster, but never got an answer.

I will approve your 1995 report, but will not accept such discrepancies in the future. Also, please use the budget forms that are sent to you from now on. A computer can be used to print the report, but your signature needs to appear on the standard report form.

Sincerely,

James E. Stanton
Sr. Water Resource Agent
