Re: House Creek Measuring Devices

Dear Mr. Guerry:

Thank you for meeting with me and Mr. Swan last month regarding water measurement and control on House Creek. I have reviewed your letter dated December 3, 1994 which asks the Department to make the 1995 House Creek measuring device due date subject to joint efforts between the water users and the Department. In particular, you have asked that the Department assist in some on-site evaluation of your ranch.

I or another Department staff member would be happy to visit your ranch and assist with measuring device questions. Such a visit will need to be made very early in the spring or perhaps late in the winter if weather permits. I am still expecting the Water District 47-C water users to install measuring devices prior to regulation of water in 1995. I believe it will be difficult for the Department to be real flexible over the 1995 spring due date since the original orders were issued in June of 1994. Our flexibility, if any, may depend on the other water users in the district. Perhaps the water users can address this matter among themselves at the annual water district meeting.

Thank you for your comments. Please contact me again regarding scheduling of the on-site visit or if you have additional questions concerning this matter.

Respectfully,
