RECEIVED
OCT 23 1995
Department of Water Resources

Dear Mr. Luke:

I received your letter of October 5, 1995, requesting the implementation of measuring devices recommended as a result of the May 26th meeting at Maurice Guerry's home. Let me bring you up to date on subsequent developments in the process that have stalled the implementation of the measuring devices for now.

A tour was conducted on our place on June 20, 1995, by Larry Heil, Preston Davis and John Byrant. The recommendations were discussed and visually demonstrated of what the implementation of measuring devices would hopefully accomplish.

Soon after the meeting, I was asked to take a map of our upper meadow to the Cedar Mesa lawyer, Mr. John Coleman, and I did this on July 6, 1995. I requested that after he studied the map and came to a conclusion with Cedar Mesa water users that the decision rendered be forwarded to me before further action would be taken. I believe that you can appreciate the time and money invested in the project, and I needed assurance that the recommendations were, indeed, acceptable to the majority stockholders before committing to this endeavor.

So, here it is, three months later, and I've not heard from Mr. Coleman. I have been very impressed with the open communication with the new Cedar Mesa Board and will certainly commit to workable solutions to problems that have been suppressed much too long.

Perhaps your inquiry to Mr. Coleman will result in information pertinent to continuance of the afore mentioned project. I will await your response.

Thank you.

Sincerely,

cc: Larry Heil
