To: Dennis Dunn, Senior water Resource Agent

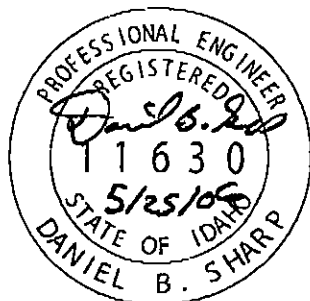

Re: J&L R.V. Resorts Well

Dear Dennis,

The Department of Environmental Quality has reviewed the water system and water well drawings for the J & L R.V. Resort and have offered comment. None of those comments are related to the construction of the well and all comments are currently being addressed to the satisfaction of the DEQ. I intend to have a final set of drawings incorporating the comments from the DEQ submitted for approval on Friday, May 26, 2006. All laws and requirements from the IDEQ and IDWR are intended to be met the project will be constructed accordingly.

Please allow Janice Pinson to obtain an expedited drilling permit based on the existing design of the well. Feel free to contact me if you have any questions or if I you need additional information on the well or it's design.

Sincerely,

Daniel B. Sharp, P.E.
