Name of Pre Owner		REMARKS
<p>Brim Cree Spaggo, S March April May June July August September October</p>	<p>Brim Creek/White Pine/Amos. ending up &amp; is where I ended up giving the Beneficial doubt. Where I normally go in an Compensat at Free Water this will offset water being charged going thru the Narrows in May &amp; June where I have doubt on CFS as it works out.</p>	<p>Brim Creek has two main decreed uses. Ina Brog has a dedicated dunee of Plus additional water than 65 sends on down. Ends up in two places as waste water but ends up in main delivery ditches which should be able to be charged. 65 Ranch is other party.</p>
<p>White Pine/ Spaggo, San  March April May June July Aug. Sept. October</p>	<p>Don's Gunderson Watermaster 45F  Aug 1, <sup>upper</sup> Meadows due to lateral from Springs were dry Cracked and approx. 11 CFS was of no Basic Beneficial use. g</p>	<p>March 1 - Oct 31, 1998 No Charge. White Pine and Amos ends up in the upper lateral of 65 which ends up merged with decreed water coming off of Sand Creek on div 'A' 'B' 'C' and it will be noted that this water should be returned to Sand Creek but at times ends up in bottom lateral going over to Allen Clark entering into the Bennett ditch which at times is used without calling for water. Amos Creek hardly ever gets to Sand Creek directly due to upper lateral going across upper meadows.</p>

REMARKS

The 1st day of April looks like rain. March went out like a lamb!! Recd no calls for water primary users are those of which I've had stock water out. Worked on ditch around 65 Corralo on upper end led them water down to Sand Creek from lateral going East past Corralo. Also worked on ditch 'Berritt over on Willis' ground - going did not repair ditch after putting board in his road is washed out at Cut and water running or generally down burrow fit into Abau Perry's delivery ditch.

REMARKS

On 5/25 off of Grant's lower Hay field I was getting  
run off to Ben Smyers (Antone/Pine/Hawell) of  
approx 3.98 (70/18"). Ben is measuring approx even  
out of his pond. Grant has been emptying off  
of Antone/Pine since 3/16 and Hawell Creek  
near 5/6 It's got to be going somewhere - Hay  
has started.

Owner

It will be noted that during  
while month of June, due to  
rain and high water, I  
was turning excess water  
out above due to water  
running to River and I  
did not have that many  
cubs. R. J. Gundersen

NOTE — Figures to be given in cubic  
feet per second for 24-hour periods, or  
24-hour second feet. Give name of owner  
of water rights, not tenant.

6/1 Raining found on through 1st part of  
month - see marsh cr.  
REMARKS

Creek is running high as of 6/4 Brim ditch turned  
off by the dam, I followed east to Chicken Run, Creek  
overlapping headgate.  $1878 = 142$  or 21 cusecs  
6/4 Ben Snyder's receiving waste water off of present dam  
line.

6/15 Leo Bull sums to think there is and has been  
150" approx in Brim ditch. Turned in 150"  
followed Brim to Rose Creek, Brook hollow was  
diverting approx 65" to Brim coming off old  
Rose Channel. Must be some of the other  
Brook hollow seeping to ditch. Rd hollow  
springs over Brim ditch #1 pipe & #2 pipe = 189  
or 95.5"

Howell Creek is overflowing lowlands  
on lower meadows at moose div and  
orchard pulled debris from Creek dropped  
overflow to orchard and .53 to moose  
div Howell is intermingling w/ Rose  
cr to old Homestead thru to Goodman  
on down thru Lee Jolly's to Marsh Cr.  
taking in Hallard/Rose/Howell to  
Marsh at Snodgrass div to Marsh  
Creek.

REMARKS

Land 'A' off, upper meadows of 65 are coming off Amos Creek & Springs from 'A' lateral

In going over May 2 find that the Berritt ditch users need to set up the following.

White Pine falls into Berritt, laterals off of Land, majority of time fall eastward and drop into Berritt ditch, all of these CFS are not gaged w/ a measuring device other than by observation and taking readings which are basic estimates when everything is said and done. Even the waste water on 65 Burrish Creek, ends up in Berritt at the Clarks - there needs to be work done in this Area so that the water gets back to Land Creek. It should not be out of the users pocket for the main Creek at Clarks.

REMARKS

Skagg's on upper 65 has been using water from Amos, White Pine and the Springs gully across top MATERIAL AS of 7/6/98. LAND CR. DIV. A, B, C & D OFF for them.

as of 7/17 started using Div 'B' which was modified - diversion/main creek laid out w/ Rocks directing main current to diversion (open ditch bank cut) many years ago. Reason why high diversion count this month.

Hand Creek

NOTE — Figures to be given in cubic feet per second for 24-hour periods, or 24-hour second feet. Give name of owner of water rights, not tenant.

Name of Pre-Owner

REMARKS

When I had a call for Hand Creek I did not have the water, it seemed that when I had water it was on the opposite creek, creating at my measuring, at the Narrows - look like I had all sorts of water - really not the case.

Name of Pre Owner

REMARKS

3/21-3/24 Pat was checking & taking calls for water. Don in W.A.D.C. Legislature Am. Leg. <sup>no calls</sup> idlet of law  
 Lock gates on 65 (new locks)  
 3/30 had to travel around (Hwy 12)  
 | | | | | | | | | |  
 Note: This whole month is covered. hardly no calls for water due to moisture from the Skies -

on 3/25 I was informed by Al Meseritt that Ben Smyers requested me (Don Gundersen, WbmsTR) off of his property. Attorney Bens office would be in pm. in's both parties of Peopl. I informed Al, the address for the time being. But if it would continue, I would enforce being jailed by Ben if need be to get the State Laws enforced. Informed Ron Sorensen / Jim Halburn of my situation.  
 attended hearing Benley 3/30 Tom Geary from Meseritt Al Meseritt on Bearp pond - got status of Spring US Water Right N/Applied at petition time. Meseritt / Geary setting up another meeting date w/ attorney.

as of 3/19 6-5 has been done, a <sup>begin</sup> but they would probably start ining. by Roger to get bill to flow. 3/21 per Pat and between 3/21-3/31 almost ~~finished~~ <sup>finished</sup> ~~river~~

lot of plowing. Regus indicated if weather continued the 4th date. Road on upper 65 (meseritt) is also drifted in water done - started Rainine Creeks started rising ~~finished~~ CFS from 3/19 from 20 CFS to 44 CFS to

24-hour second feet. Give name of owner  
of water rights, not tenant.

Waugh ditch R/Stock 30  
up to when Callo  
REMARKS started on ditch 4/22

Upper 65 Marsh Cr. A & B  
were left over from earlier letting  
until I could get in on Check  
on a Regular Basis.

4/12 T heavy, showed a lot of  
above on West side. Streams are  
flowing pretty good and have  
been. Tom has not filed his  
diversion's that have been  
requested when his son  
Rich was in charge. Water  
running to lower meadow  
Anderson is picking up a lot  
of 'D' results from upper  
West meadow and 'E' div ditch

Irrigating upper meadow by Pump  
and lower to where a lot of water  
was. 50 degrees

4/24 at Durvus total CFS going into  
was variables at Res. Slip and Anderson  
between Res. final at meadow  
see it running out to desert

4/13 65 Mrs. Mike requested Bill data 5cc? 2 indicated  
5cc problem was probably part of 7 around prepare data  
for 65 - started snowing again

This is a strong year - water not being called but  
some are using Run off and are actually irrigating  
I believe they are going to be compensated if water  
is traveling through ditch - that is going to be a big  
especially in T. Basin area he has not adjusted  
to any diversion corrections - this is where he  
gets his spring water for projected pond!!

4/18 Twin Falls Watermaster school in Kimberly

Martin Maye/Bandell Allen Chaps  
showed up in Billing in months June,  
July, Aug, and Oct. They had pump in  
Creek with a total hour usage estimated  
at 240 hrs, therefore, I put the Chaps  
in the Above months. CFS was brought about as  
follow. 6 5/32 Nozzles at 35" w/16.17 CFS ASA  
Result. OK.

65 and still irrigating from 4 to 2 ponds + well and this  
Slip - 41.16 CFS (where in hell is all the water going  
at Anderson! to damn big is a diff. yet I don't  
see ready for particulars!

REMARKS

SKAGG'S, SAM L  
65 - (Snowdome)

5/1 have not rec'd a call for water from either Meyer or Anderson Sw. yet both are still sitting what you call High water or unregulated water in meadows are being irrigated from delivery ditches coming off of Meadows putting the laterals due to man-seg, discharges, where water should be going to Creek (must)

5/21 rec'd 9:11 warning of possible Mts. of flooding this afternoon along with Rapt River thru Alma - mtn - storming Big Top upon Top 13:45 tried to get a hold of Mike at 6-5 no one answered. Alert again on 5/26 till 17:00 hours. in checking Creeks all were within their Channels except Howell along banks - and at Alalup where road is washed out - running thru meadows to Summit Creek - 5/21 Channel thru Anderson (Barrington) to Creek is high quite charging for water on that diversion

Narrows - 65 =  
+ Highland ditch  
+ main (14' wid)  
= Total rec'd in  
Reservoir Slip  
- Anderson Slip  
= Total CFS used

Note: All decrees on land on Lower 65 RANCH. Water main at Narrows and the CFS going past the Anderson SLIP IS Subtracted to get total CFS used from Narrows, when floods are placed at Anderson - High WTR NO

Congrs exists!

REMARKS

45 Upper Marsh

4/10 was able to get up to Lake Cleveland div. had to walk in from

65 Snodgrass

Blunnie Cokin. div. mess device at weir needs work. Can't really take a positive reading, had to go below for a reading. 40/6" had been higher. 804

4/3 .30 inches of rain and 14:30 hrs 6/2 and 14:20 to say started raining again

4/25 .65 in 24 hrs of rain

Snodgrass is a multitude of both the Rose Creek/Howell creek run off on Hallard & Rose Cr. thru the Snodgrass diversion point on accumulation off the waters. Also, note portion ended up in Marsh Creek. Marsh Creek, but 2 am showing it here this morning. US the Rose Cr. had repair job at Anderson. 6/5 Pump Welder Cr.

4/1 sprinklers all around building, 6 pivots + all wheel lines So side of Marsh at Anderson

4/7 1 pivot + all wheel lines So Anderson side of Marsh

4/8 5 pivots " " " " " "

4/13 6 pivots + all wheel lines both sides of Anderson

4/15 9 pivots + " " " " " "

4/22 12 pivots + wheel lines both sides of Anderson

4/29 11 pivots + " " " " " " + around house

4/25 Cannot explain such a great diff on CFS at Anderson's slip to River. No incoming CFS where is no water being put - I cannot find it, but there is a difference which has cropped up this year in the 1st 3 miles of diverging on to main branch.

9/14 City/Ben portion of decree running to Creek. Anyone viewing this log can see the Abuse of Conflicting Interest when Ben ditch rider (Fox In the Hen House) has been appointed year after year by those individuals who are not bothered down stream. Again, this will not happen in 1999 if Ben ~~is~~ re-elected.

9/19 ? since he (Don) is next in line why the water was still going thru to Creek as stated above - Turn Vaughn down to 46/18. Water over to Banner's Weir - no water followed ditch to Merrills - big stream going to the North direction. Staying on Merrills ground his pump (well) is located in the vicinity its still tamped from previous season - has not been turned on - He's had 3 cuttings of Hay off of the City - I can see where Mr. Perroy was having his problem - when he was alive.

The City has got to set up a div plan and Don Merril has got to quit using main delivery ditch as his irrigation ditch on meadows. It does no good to try and work with any of the parties the City won't put it down on paper.

NOTE — Figures to be given in cubic feet per second for 24-hour periods, or 24-hour second feet. Give name of owner of water rights, not tenant.

Name of Pre Owner	REMARKS
Clark, Grant Antone/Pine Cr	Antone & Pine Creek, main delivery ditch running north/south to Clark and branches to the west to Hawkes was not maintained at all - during all of my trips to this div. it equated to approx a 60/40 share and that is where I will be coming from. Hawkes at 40% of Antone was right from the beginning Irrig. the day from from above and released portions down to orchard. Again neither party worked the diversion at this point on a rotation basis therefore they are charged as stated 60/40 during season.
Between Clark & Hawkes w/ Pine Cr. running at div upon top I had estimated a 60/40. The water was never dammed off till late in season. Therefore Pine Cr to Clark was 60% plus what he picked up going across our measurements. What I was measured on Pine Hawkes got his for 40% even though only a portion showed at Orchard, he was taken in Irrigation at top of his field (dry farm). He was charged for that.	Grant Clark started per his call on 3/16 therefore that is where I start the yearly or season charge. The problem is, I could not get a reading until March 30 <sup>th</sup> - All areas where measuring is Copabele are all covered up in snow. Therefore, that is where I start charging 3/30.
R. J. Am
