Household Creek

Name of Pre Owner	REMARKS
	<p>3/12 AT EARLS DIV. I read .56 US .40 He's INDICATED ALSO, FOUND SUCCESSIVE RUN OFF UPPER FIELD WHERE ITS GOING TO KEVIN SMYER - HE INDICATES ITS FROM SPRING CR. 1' head, I believe WHEN HE TOLD ME 53" IT WAS .53 ON THE VERTICAL MEAS. DEV. because when I read it IT WAS SITTING AT .59/9 THEREFORE I RECORDED 1.37 CFS convert to inches = 68.5" and .53/9 = 1.66 or 58" Not 53".</p>
	<p>3/25 Rec'd call from Bell, he still had no water, what spring, did I shut him off, etc. Everything was normal at the headgate .44-.46/18 as I originally started with bell. Bring all the way to Bell's measuring device in upper field .20/12 minor going through. Spend a total of 24 hours checking his original request (call that Am). ditch bed dry. Briers off of those will fence line approx 125' in was causing the delay - <sup>at</sup> Rose Creek had approx 55-60" (Rose cr it self has about 25") No water at all coming off of Bird Hollow or the springs - it's dry !!</p>

Name of Present Owner	REMARKS
	<p>4/5 Point of Interest: followed Hawell to Broadhollow Canyon. Tricked to Broadhollow Creek which travels around ridge towards Rose Canyon - which was man made I don't know - But, interesting approx. 35' past the original channel - The Creek has broke out w/ approx 20" followed it down to where original channel would meet Hawell Creek. (100 gds) above Brem Ditch div. The water had seeped approx 1/3 the way down main channel - Remaining water traveling to Rose Canyon estimated approx 15-20" stops at approx 200 gds at a Snow bank.</p>
	<p>4/30 Chalburn, Jeff called for water I indicated that Hawell had not broke loose as yet. And what was on Summit Cr. must be getting dried in Ben's Res. not very much coming through - I had not been on property yet to check.</p>

REMARKS

6/11 Only time will tell - Howell is going to end up dedicated to help w/ sand to fill 2nd & 3rd reach of GS below!!

6/22 14:30 hrs pulled D. Anderson's water (1.88 CFS) directly to main channel of Howell Cr directed to GS Narrows - checked Dick's house left word with Lindsey, his grand daughter -

6/23 Dick Anderson wanted to know what was happening - a little upset - he had not got my message.

6/29 I guess someone has been holding out picked up approx 42"

	17	18	19	20	21	22	23	24
	25	26	27	28	29	30	31	Total

6/23 Dick Anderson seemed wanting to know why he had no water - I mentioned I left wood w/ his grand daughter when I diverted everything to main channel -

Dick is dissatisfied on two basis that I'm up in a row looking for water in over 33 years. Also, people up here (in the valley) are trying to make a living vs. Co's logic of working on tapes loss - logic is not there. I tried to reassure Dick that while I ~~was~~ have been watermaster Co has submitted a letter for requesting their secured rights but have not had to resort to having to pull the 1st right off Howell up to these last 2 years -

3 - Pomerelle Ski Resort is operating full year. Us Winter, their meter reading shows this—	
Where are we going!! Still irrigating to create fire line? But, I believe the fire liability is being abused—	
Watermaster 45F	

REMARKS

Note: 7/21/02 John Buschmann called and was asking for Re-charge - everything gone - No Water - 2 good days due to fire liability!!

Pomerelle is running all year, which is not what their original "Bened Mark" proposed to the Water District and Dept. of Water Resources which <sup>was</sup> laid out in memo of 5/31/00 from Allen Merritt, IDWR Southern Region Mgr.

It will be noted Pomerelle had problems

- 1- due to drought - had to call upon Watermaster to furnish water (as, was gals) reserved for fire possibility - (compromised since they were operating during summer (12 months operation))
- 2- (cooped lines) created problems when they started up w/ Bennett Spr. They had double septum as I understand, still intact.

REMARKS

20

Watermaster's Summary -

After the 7/21/02 Call for water and going with their own meter readings - (they posted) - I can only assume why they are out of water, when everything and everyone is dried up as to water and you look at the ~~water~~ meter readings !! They are operating all 12 months - goes against the Bench Mark and Documentation presented by Pomerville and to the memo from Water Resources of May of 2000.

This is my summary after going over data at end of year.  
 Ken Anderson,  
 watermaster 45F

It will be noted that an additional 215,000 gals were pumped from Lake Cleveland - both Parties Anderson & Montgomery gave it for Hwy District # Howell Calken Road Repair - also included the Dodge Commercial use. There was no charge by Water Dist 45F.

Howell Creek

NOTE — Figures to be given in cubic feet per second for 24-hour periods, or 24-hour second feet. Give name of owner of water rights, not tenant.

Name of Owner	REMARKS
	It will be noted this separate book on Howell Creek charges (last year) are just a means of covering Carlo Mon-Graug's right during the off-months of irrigation. Mr. Carl Weather was unable to start his regular season of September 15, 2001 due to the drought brought on during the summer. There was no water out on Howell Creek above from June 22, 2001 through October 13 <sup>th</sup> . Therefore, irrigation above ran into the month of November and with the shortage of water he was unable to start until Dec 10 <sup>th</sup> .

Upper Meadows on Marsh to div 'A' where water is not getting to Creek being spread out by ditch rider from 65.

REMARKS
4/1 Semi-Cloudy, wind stopped, melting went good yesterday - Bad news is - There's No Water out there from Malad to Blackfoot. Going to be a bad year. Goes with what I have stated about our drainage - no Snow Packs !!
4/3 Already thinking of pulling someone off Marsh not enough water for my call this AM. Even fails, when one starts they all start!! est. 405" and I need 435" <sup>est</sup> . Also had a meeting w/ Konlu, until 65 calls for water, its all going to stay above.
4/4 The main Channel of Marsh is dry at the Cross Roads (Bridge @ Westinghouse @ 9005 !!
4/6 dropped Condi to 1/2 his call due to abuse found it going to Land Co. Turned approx 20" to Bailey & Pat 20" to Robert Adams
4/11 Ditch boards for at Land 66/Robinson
4/12 Couldn't get past Robert Bennett due to Snow drifted in - Couldn't measure narrow - Cuck started flowing real good around 16:00 hrs not very high but a better flow than what I had previous.

4/30 <sup>wally</sup> set w/ Water Resources on the mtg room - Its like "P as" off from Jess - Theres water in the Creek - he stated that 4/19.

4/25 Probe Cleveland Div to Marsh Co. river completely unusable, has been for the last 4 years. It will be noted that has been no water going down delivery ditch not even the Spring that normally runs is dried up - so theres been no help from Cleveland at all this spring -

Check Pomerelle out on what John Burrows - eluded to - water starting to run over parking lot - very disappoin<sup>g</sup> total Hawell Creek is at approx. 150"-160" Pond + Antone running about 20" total

It looks very dry -

4/26 Hawker has generally called for water - looks like I will have to shut Brim ditch down - Trel Brakenbury just got started.

John Burrows called for water as much as I can get him - There goes my concept of yesterday - !!!

4/28 Kevin Banner finally called for water !!

REMARKS

Montgomery, He  
Wetzstein, Ken  
Cooper, Kent

5/17 still having problems w/ Geo & Kent on 'G' I have adj. to 50/50 - there a total of 160" @ 3.20 CFS. Something has got to be

5/01 People on the request log for water if available - Eldon Adams, Randy Miller, Dick Adams, Kent Cooper - Devin Clark - Hill - 2 can't even fill the whole rights that I am delivering right now other than 1st - 3rd in line also, went in on Bens Res. Summit running 28/40 = 1.63 CFS into Res. Checked at 1000 and I am not getting .81 inches at entry - taking in Chat/Howell weir (which includes Howell) I have an est. of approx 45". He's back at St. MAR will continue to let Ben have his way!!!

Particulars

Month of June 1921  
Marsh Creek

NOTE — Figures to be given in cubic feet per second for 24-hour periods, or 24-hour second feet. Give name of owner of water rights, not tenant.

Name of Proprietor	Owner
Daugh Peter, As of 6/11 5 have Messel/	Marsh
City of Alb Banner / City of Ben Chatterton	
Messell, De Land - Sorenson, 65-Ben	
Chatterton, L. & Robinson	
4 main chan.	Oswell-
Messell, Dor	Dawker / Clark & Anderson
Banner, Be	Goodman - Chatterton, JH
Cunningham,	with 65 - below - It looks
Asher, Tom	like very shortly -
Geary, Tom	Howell & Land is going
	to end up dedicated in
Anderson, Ace	feeding 2nd & 3rd right
	to 65 below !! send -
	We are really in a drought
	6/13 Mike Kessler on phone
	would be submitting letter re
Narrows: F	their 2 & 3rd right he full fill
Highlandite	also irrigating below -
Main (1: Robinson	also indicated
Total CFS	he was ready for water - 2
add diverted wat	decided that there was between
for 65 - Narrows	175 - 200 in land and it would
(Howell & L)	have to be split w/ 65 Ben

Rotations

REMARKS
6/22 Turned Dick Anderson off of Howell at 14:30 hrs, everything on Howell est (1,884.76 = 2,649 4.05) 6.69 CFS. A 2nd reading at Narrows = same as AM. Pool not reached as yet.
As of 6/22 the average monthly rate of 65: decreed right = 6.79 or 3385"
6/14 Geo Montgomery called looking for water!! 'NONE'
6/20 Had a meeting w/ Mr. Skagg's/Kessler and Lynn Taylor discussed where I was at and where Taylor's schedule is on his Irrigation - Went good - Also, stated I was sure could not make water and only hoped nature would help - Taylor hoping that the next possible (3 wks) he would be at least receiving 310" along w/ his deep wells - he could probably make it - Hopefully water will hold out - the only place I'll be able to go is the 1875 411 irrig on Howell -

REMARKS

As of 7/25, I do have to commend the Water District in adhering to no water <sup>retention,</sup> and leaving it ~~to~~ alone - It has helped me tremendously in doing my job as the Watermaster.

Interesting GS Charge was for  
2nd & 3rd night = 161.20 CFS  
Actual Charges = 169.69 ended up  
with 8.49 into their  
3rd night or 5<sup>th</sup> night  
on Marsh - which could of been over the  
31 days = ~~31 CFS~~ 31 CFS

On the 22nd of June had  
and put it down to GS Ran  
night on Land Creek to LeRoy  
diversion putting all of  
Creek diversion measurement  
maintaining average of 2.0 cfs  
where Howell and Marsh comes  
right of GS - <sup>2.0 cfs</sup> with what 5.2 CFS  
therefore making the gates.

to pull last night at head of Howell Creek  
Ones 2nd and 3rd night, thus leaving 1/2  
Roberson, had to pull horses 7/23 on Land  
Creek (est. 90" or 1.80 CFS). At Howell  
is at Chatburn, 944. which is running and  
CFS a 103", I do not have an estimated reading  
together - but have maintained the Land 3rd  
I do pick up some water before the Narrows,  
I do not have the loss on Howell Creek -

Name of Present Owner
9/1 65-Ranch - It will be noted the highland ditch from headgate and beyond 36" partial of the lower opened channel for free below main stream Weir

REMARKS
9/4 lost my front bumper off of Bubba my Truck took 2 people to put it in back of bed - must get it welded back on -
9/12 meet w/ Jerry Skinner IWR @ 6005! For verification of site in Complaint
9/13 - Taking measurements today on marsh - there is a definite loss on Laughlin ditch at 94" & Chatterbox only getting 30 1/2" !! He's losing it in his delivery - if only he'd send his ditch rider in and check - looks like I'll probably have to. Had a good rain.
9/14 Creek back to Normal be noted the highland ditch from headgate and have been cleaned out of shrubs and flow. Also, they are rip-rapping where they went in and repaired Weir

10/16 Notified the following people (most in line) or left word. Some got back to me others didn't. Therefore, where I have the water, is the outcome of my Impress (see back Cover)
10/18 Merrill in N corner of meadows North of Deepwell they have been taking water out on Ken keep ditch. Reason City of Chattanooga was not getting their rotation properly.
10/31 Merrills Ranch picked up on an additional 8.30PS off of the Rotation due to the fact they had not maintained the delivery ditch's and the other 2 parties did not get the full Rotation - the final Result was due to find out what really was going on 10/18. My Adjustments

REMARKS
10/16 When into the last month of Irrigation and as is still calling for their share of water, leaving Howell, on the upper reaches of the Val right of 4/1/1875 a record year for drought conditions with out water. a total of 101 days, starting out into October 2001.
The City is calling for water. The Merrills Ranch has been 'milking' the repair on the delivery ditch. They Paul had a total of .5 days. If nothing happens within the next day or two. I will be turning water to the main Channel.
It will be noted that I turned the City their Rotation - hoping the water gets there.
Yate: heeded for an appointment to Shoshone - looking for Fire equipment.
10/2 Ken Maxon, informed me he was getting hardly any water.
10/11 Has reached the Narrows at measuring time - did inform G.S. (Mike Kossel) I was turning 60" above on Howell. Rain did Re Roy good - Also if he needs water
I will go with some of Maush CR. due to the fact 1st night is not cracked up to what

Name of Property Owner	REMARKS
BRIM CREEK DROZE, J. A.	Rose Creek drop off quickly in the month of July.
MARCH	
APRIL	
MAY	
JUNE	
JULY	6/18 Ken Clark wanted to know who pulled trap on Brim Creek - Ed Clark, Doc Stoutman men did from Spencers group - informed them that they only had dedicated 6" that they had to fix their storage on Adams place if they need water for cattle - That's all the water they had -
AUGUST	
SEPTEMBER	
October	
SKAGG'S, SAM L.	7/4 Again Spencers pulled trap - this time all water is changed to Dreg - est. 114 6 S cannot benefit by use of water - Approximately 40 head of cattle got out due to no water - Spencers did not do any repair on Reservoir to help store water for cattle and 6" or less is not going to handle that many cattle when its just running down ditch due to ground absorption and evaporation.

Name of Pre Owner	REMARKS
WHITE PINE SKAGG'S, S	<p>4/11 Ken Clark is 65 Ranch's ditch reles Ken decided to the find that there was approx 40-45" total in whitepine when he started irrigating. intermitten 2 got some total readings of Creek status along w/ my readings done in Blue taken from my dig's diary.</p> <p>Don G. Henderson Whitman 4SE</p>
March	<p>8/6 turned water towards Grand Creek delivering ditch obsorbs final 1/3 of the way - only beneficial use was aquifer.</p>
April	<p>Thank god for the rains and then again white pine does not finally break loose until the middle part of June which in this case was about the same as in the Past. Ken decided toward the end of month (2nd wk) that he noticed a difference in the volume of water being more - estimated approx 50".</p>
