December 4, 1995

Water District: 43-B, Upper Raft River

Dear Mr. Hope;

We are returning your 1995 watermaster's report for correction. The cost, adopted budget, and credit columns do not appear to be correct. Also, the number of service days and the cost per day are not shown.

You show that only four parties actually got water. For these parties, however, you show no difference between the adopted-budget and credit columns. The credit should be the adopted budget minus the cost of delivery for each person. For five of the people that received no water, you show a reduction in the credit amount anyway; this does not make sense, since no cost was apparently incurred by these folks.

Please make the necessary corrections before returning the watermaster's report to this office. Two new forms are enclosed for your use. We acknowledge receipt of your proposed budget for 1996.

Sincerely,

James E. Stanton
Sr. Water Resource Agent
