Re: 1994 Ground Water Measurements and Estimate of Withdrawals

Dear Mr. McCaslin:

According to water right records on file with the Idaho Department of Water Resources (IDWR), you are the owner of a ground water well located in Township 07N, Range 24E, Section 20, NWNENE. During 1994, staff from Water District 34 visited this well and made a measurement of pump discharge.

On July 7, 1994, the diversion rate of your well was measured at 4.87 cfs. According to water rights on record with IDWR, the rate of diversion authorized for this well is only 2.49 cfs.

Water District staff also estimated total annual volume of water withdrawn from your well using power record information. Estimated volume from your well in 1994 was 1061 acre-feet. According to IDWR water right records, the total annual volume of water authorized to be diverted from your well is 367.8 acre-feet.

The purpose of this letter is to advise you of the Water District's 1994 measurements and estimated volumes for the above referenced well. IDWR wishes to provide you an opportunity to provide any information or evidence to show that the above findings are incorrect. If you believe that these findings are wrong, then you should contact the Department immediately and provide the necessary information or documentation. We very much wish to work with you and assure that all the measurements, utility data, and water rights analysis are accurate.

If you do not provide a response to this letter on or before May 22, 1995, then the Department will assume that the above findings are correct. Actions may be initiated by the Department to monitor and regulate the well in 1995.

Questions concerning this matter may be addressed to Doug Rosenkrance, Water District 34 watermaster, or to either Scott King or Tim Luke at IDWR in Boise.

Respectfully,  
*Tim Luke*

Re: 1994 Ground Water Measurements and Estimate of Withdrawals

Dear Mr. Burt:

According to water right records on file with the Idaho Department of Water Resources (IDWR), you are the owner of a ground water well located in Township 05N, Range 26E, Section 28, NWNWNW. During 1994, staff from Water District 34 visited this well and made a measurement of pump discharge.

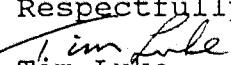

On July 29, 1994, the diversion rate of your well was measured at 3.66 cfs. According to water rights on record with IDWR, the rate of diversion authorized for this well is only 1.40 cfs.

Water District staff also estimated total annual volume of water withdrawn from your well using power record information. Estimated volume from your well in 1994 was 775 acre-feet. According to IDWR water right records, the total annual volume of water authorized to be diverted from your well is 245 acre-feet.

The purpose of this letter is to advise you of the Water District's 1994 measurements and estimated volumes for the above referenced well. IDWR wishes to provide you an opportunity to provide any information or evidence to show that the above findings are incorrect. If you believe that these findings are wrong, then you should contact the Department immediately and provide the necessary information or documentation. We very much wish to work with you and assure that all the measurements, utility data, and water rights analysis are accurate.

If you do not provide a response to this letter on or before May 22, 1995, then the Department will assume that the above findings are correct. Actions may be initiated by the Department to monitor and regulate the well in 1995.

Questions concerning this matter may be addressed to Doug Rosenkrance, Water District 34 watermaster, or to either Scott King or Tim Luke at IDWR in Boise.

Re: 1994 Ground Water Measurements and Estimate of Withdrawals

Dear Mr. Jensen:

According to water right records on file with the Idaho Department of Water Resources (IDWR), you are the owner of a ground water well located in Township 05N, Range 26E, Section 22, NWNENE. During 1994, staff from Water District 34 visited this well and made a measurement of pump discharge.

On June 29, 1994, the diversion rate of your well was measured at 4.20 cfs. According to water rights on record with IDWR, the rate of diversion authorized for this well is only 1.58 cfs.

Water District staff also estimated total annual volume of water withdrawn from your well using power record information. Estimated volume from your well in 1994 was 1092 acre-feet. According to IDWR water right records, the total annual volume of water authorized to be diverted from your well is 276.5 acre-feet.

The purpose of this letter is to advise you of the Water District's 1994 measurements and estimated volumes for the above referenced well. IDWR wishes to provide you an opportunity to provide any information or evidence to show that the above findings are incorrect. If you believe that these findings are wrong, then you should contact the Department immediately and provide the necessary information or documentation. We very much wish to work with you and assure that all the measurements, utility data, and water rights analysis are accurate.

If you do not provide a response to this letter on or before May 22, 1995, then the Department will assume that the above findings are correct. Actions may be initiated by the Department to monitor and regulate the well in 1995.

Questions concerning this matter may be addressed to Doug Rosenkrance, Water District 34 watermaster, or to either Scott King or Tim Luke at IDWR in Boise.

Re: 1994 Ground Water Measurements and Estimate of Withdrawals

Dear Sir:

According to water right records on file with the Idaho Department of Water Resources (IDWR), you are the owner of a ground water well located in Township 05N, Range 26E, Section 21, NWNWNW. During 1994, staff from Water District 34 visited this well and made a measurement of pump discharge.

On September 5, 1994, the diversion rate of your well was measured at 5.10 cfs. According to water rights on record with IDWR, the rate of diversion authorized for this well is only 2.90 cfs.

Water District staff also estimated total annual volume of water withdrawn from your well using power record information. Estimated volume from your well in 1994 was 1344 acre-feet. According to IDWR water right records, the total annual volume of water authorized to be diverted from your well is 507.5 acre-feet.

The purpose of this letter is to advise you of the Water District's 1994 measurements and estimated volumes for the above referenced well. IDWR wishes to provide you an opportunity to provide any information or evidence to show that the above findings are incorrect. If you believe that these findings are wrong, then you should contact the Department immediately and provide the necessary information or documentation. We very much wish to work with you and assure that all the measurements, utility data, and water rights analysis are accurate.

Re: 1994 Ground Water Measurements and Estimate of Withdrawals

Dear Sir:

According to water right records on file with the Idaho Department of Water Resources (IDWR), you are the owner of a ground water well located in Township 04N, Range 26E, Section 15, NWNWSW. During 1994, staff from Water District 34 visited this well and made a measurement of pump discharge.

On June 3, 1994, the diversion rate of your well was measured at 6.50 cfs. According to water rights on record with IDWR, the rate of diversion authorized for this well is only 4.40 cfs.

Water District staff also estimated total annual volume of water withdrawn from your well using power record information. Estimated volume from your well in 1994 was 1972 acre-feet. According to IDWR water right records, the total annual volume of water authorized to be diverted from your well is 770 acre-feet.

The purpose of this letter is to advise you of the Water District's 1994 measurements and estimated volumes for the above referenced well. IDWR wishes to provide you an opportunity to provide any information or evidence to show that the above findings are incorrect. If you believe that these findings are wrong, then you should contact the Department immediately and provide the necessary information or documentation. We very much wish to work with you and assure that all the measurements, utility data, and water rights analysis are accurate.

If you do not provide a response to this letter on or before May 22, 1995, then the Department will assume that the above findings are correct. Actions may be initiated by the Department to monitor and regulate the well in 1995.

Questions concerning this matter may be addressed to Doug Rosenkrance, Water District 34 watermaster, or to either Scott King or Tim Luke at IDWR in Boise.

Respectfully,

  
Tim Luke
