November 8, 2004

Mr. Karl Dreher
322 Front Street
P.O. Box 83720
Boise, Idaho 83720

Dear Mr. Dreher:

The following pages contain the annual report of the distribution of water for the Big Lost River, From November 1, 2002 to October 31, 2003

The Authority to distribute water using water rights in the Basin 34 Directors Report was provided by the Memorandum decision and order granting the Department of Water Resources' motion for interim Administration with Limitation, or decrees issued by the SRBA court.

Very truly yours,

Robert Duke
Watermaster
District #34-Big Lost River

WATER DISTRICT #34
P. O. BOX 53
MACKAY, IDAHO 83251

SUMMARY OF ANNUAL REPORT FOR 2003

Basin #34 experienced another year of drought conditions in 2003, providing insufficient water supply to the users of the area.

There was one high water peak at the Howell Gauging Station. This occurred on May 31, 2003 with an almost record setting run off of 3620 cfs. From this peak the water continually declined throughout the season.

We began the season calling rights with a September 12, 1884 priority. When the river began to flow Priority dates were often established on a daily basis. All water rights were on for approximately 10 days. There was very little rain during the season to contribute to the irrigation. It was very dry and above normal temperatures for the largest part of the season. A futile call again made on the lower valley on August 11, 2003. All junior surface water rights to August 10, 1883 were curtailed for three days before the futile call determination was made.

Ground water levels continued to decline and more domestic wells went dry during the year. The area that appeared to suffer the most was below the Darlington area, although there were some domestic wells that went dry in the area just North and East of Darlington.

The river at the Howell Gauging Station broke on June 30, 2003. The levels there continued a slow decline throughout the rest of the season with very little increases due to rain.

The Mackay Reservoir again was drained to the lowest level possible.

Robert Duke
Watermaster
Water District #34

**Clarification of Flow Data
For
Gauging Stations**

Reported flows in the attached tables for gauging stations below the Moore Diversion and Arco Canal (or below the Munsey Diversion), were estimated by water district staff. These reported flows are the flows that were entered and used in the IDWR Big Lost River Flow Accounting Program. Flows were estimated by measuring the head of water over concrete diversion dams and application of a weir discharge formula respectively at the Moore-Eastside and Arco-Munsey diversion dams.

The USGS tables titled station number 13120500 Big Lost River At Howell Ranch and station number 13132500 Big Lost River Nr Arco are the final data prepared by the USGS for its gauging stations located north of the Mackay Reservoir and four miles southeast of Arco, respectively.

Flow reported for the gauging station at Leslie are based on actual 1998 current meter measurements on the Big Lost bridge near Leslie and the development of a stage-discharge rating table by IDWR and the Watermaster. Tables reporting flows for the Big Lost River below the Mackay Reservoir (or the 2B gage) include data as read and recorded daily by the Watermaster and as reported by the USGS.

**Diversions in CFS for
Antelope, Alder Creek, and Pass Creek
For Year 2003**

| DIVERSION | MAY | JUNE | JULY | AUGUST | SEPT. | OCT. | TOTAL |
|------------------|------------|-------------|-------------|---------------|--------------|-------------|--------------|
| Antelope | | | | | | | 7,030 |
| Alder Creek | | | | | | | 870 |
| Pass Creek | | | | | | | 686 |
| Total | | | | | | | 8,586 |

Diversion totals are reported in CFS/Cubic Feet per Second

WATER DISTRICT 34
 ANNUAL VOLUME ESTIMATES FOR GROUND WATER WELLS
 Annual volume estimates are based on power use data provided by Lost River Electric Cooperative (LRE) and PCC measurement data provided by Water District 34.

PCC acre-foot qualifier codes:
 Z = zero power consumption
 N = PCC not available (Water District has PCC data that needs to be entered for these diversions.)
 9 = PCC was estimated, not measured. Where PCC measurements were not provided by Water District 34, PCCs were estimated, usually by estimating the power demand from the motor horsepower reported by LRE and estimating the flow rate using water right flow rate limits. Where Water District 34 provided a measured flow rate, it was used with an estimated power demand to estimate the PCC. For POD number 69, the PCC measured by the Water District at POD number 71 was used for the estimate.
 Q = see WMIS for comments concerning the measured PCC

Note that several PODs have multiple reports. The non-billing reporter should be deleted from this list to avoid duplication.
