11:33 a.m.

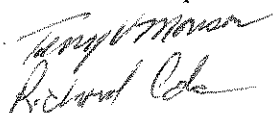

Idaho Department Of Water Resources:

I Terry Monson and Richard Cole, ground water users in water district 34 here by submit this letter for mitigation requirements you have requested.

Upper Valley Water Pumpers have submitted a mitigation plan, that we have agreed with and signed.

The water district 34 advisory board has voted on a plan to augment the water rights listed in this mitigation letter. The plan is to pump ground water. If the Upper Valley Pumpers mitigation plan is not accepted, I will under great duress accept the water district 34 augmentation plan to pump ground water. Only if it will stop curtailment of the use of our wells.

Please keep us informed.

Handwritten signatures of Terry Monson and Richard Cole. The signature of Terry Monson is written above the signature of Richard Cole.
