Water Year 2002 Report

The water year started out to look as though we were going to have a normal or above water year. However by January we saw much of the snow pack disappearing ending up at 65-70 percent of the 30 year average much below average. During the spring runoff much of the needed water went into the ground rather than running off. This condition continued throughout the spring and summer.

This year we were unable to release any water from the reservoir prior to the irrigation season and lacked 1300 Acre Feet from filling when water was called for irrigation. As a result we are seeing below average levels in the ground water in the valley.

The irrigation deliveries started the first of May and continued though the summer. This has been the second driest water year since I took over the watermaster position in 1995. The rest of the summer continued to be extremely dry and the runoff was well below normal most of the storage water had been delivered by the end of August.

The total runoff for the Little Wood River Basin was 59,000 acre feet (this is the eleventh driest in history) with 35,000 acre feet delivered to the farms and town lots. This is about 55% of the normal runoff (108,000 AF) and much below average water use.

In 2001 we saw more ground converted to sprinkler irrigation again and the crop rotation adjusted for the dry conditions of the year. The district is now well over 85% sprinkler irrigated compared to less than 10% 20 years ago. Most of this is a result of the long drought that we saw in this area in the late 1980's and early 1990's. With the ever increasing cost of power for the pumps there is a real push to be able to put the whole district under a pressurized pipeline to both conserve water and energy. This is an ongoing project that could become reality within the next few years.

With the funding that was received last year the District and NRCS is in the process of completing an environmental impact study for the possible upgrading of the system to a total enclosed pressurized system.

REMARKS							
	50% Peterson Farms						
X							

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

2. The second section covers the process of reconciling accounts. It explains how to compare the internal records with the bank statements to identify any discrepancies. Regular reconciliation is crucial for catching errors early and preventing them from escalating.

3. The third part of the document addresses the issue of budgeting. It provides a step-by-step guide on how to create a realistic budget based on historical data and current market conditions. The goal is to allocate resources effectively and avoid overspending.

4. The fourth section discusses the role of technology in financial management. It highlights the benefits of using accounting software to automate repetitive tasks and generate reports. This not only saves time but also reduces the risk of human error.

5. The final part of the document offers some general advice on financial planning. It suggests that businesses should regularly review their financial performance and adjust their strategies as needed. Staying proactive is key to long-term success.
