WATER RESOURCES
WESTERN REGION

The Idaho Department of Water Resources' board called the meeting to reactivate the Stuart Gulch Water District. We must become active since The Terteling Company has transferred water rights from the "Flora" well to another well on their property on Cartwright Road.

First order of business was electing the following new officers:

Garnette Monnie--Chairman
Mary Ryan---Secretary
Dave Henrickson---Treasurer

These officers will serve for one year on an annual basis (March to March) and they must be reappointed.

Next order of business was accepting the 1996 budget of

\$1126.13. The treasurer will confirm the existing balance in the checking account and report to us at the Dec. meeting. It was decided to defer assessments to a later date and at that time increase the budget if necessary. After discussing methods of voting by the members we decided on 1 vote per member or invoke water shares.

As a water district we must find our own solutions. All members participate in the advisory committee where we talk about solutions since we control our district. If we can not reach an agreement then we call in the Idaho Dept. of Water Resources.

We talked about our need for a water master. We will have a Dec. 5th meeting at 1:00 pm at the Quail Hollow Club House to review likely candidates to be a water master. The compensation for the water master, mileage, and cost of workman's compensation insurance will be determined at that meeting. The duties of the water master were discussed and included the delivery of water to senior wells and if you do not pay you assessed fee you will not receive water. Water assessments are to be paid by June 1st.

The installation of monitoring devices on all the wells were discussed. The discussion centered on the importance of keeping an accurate record of your temperature and pressure on your well. This will give the water master a history of your well.

At the March meeting of the water district we will discuss

what the minimum payment will be to stay active.
Meeting adjourned at 3:30 pm
