Subject: FW: FYI - WATER DISTRICT 63-S, STEWART GULCH

Gary,
Please contact me at your earliest convenience to discuss coordination for notification and coordination of a special meeting for water district 63-S. This is in response to the petition we received last week from Edwards Family LLC to reactivate the district. The agreement between Edwards and Terteling specifies that both parties were to petition for reactivation of the district after approval of water right transfer 68558. Review of records in our database indicates that the transfer was approved earlier this summer.

Pursuant to 42-605(11), a special meeting can be called by the director upon several circumstances including a petition from users representing 30% of the votes cast at the last regular annual meeting. I'm not certain if petitioner Edwards Family LLC constitutes 30% of votes cast at last regular meeting held or if that is even determinable. However, this may be moot since the code also allows the director to call a meeting on his own motion if he believes it is necessary. It seems like it may be appropriate to proceed with the Director calling a meeting on his own motion if nothing else.

Tim Luke

I have received a petition from Dana Hofstetter for the reactivation of Water District 63-S by holding a special meeting and appointing a watermaster as provided in section 42-605(11), Idaho Code.

By copy of this email message, I am forwarding the petition to Tim Luke and asking him to coordinate with Western Region in setting up the special meeting. lgs
