Jim:

Enclosed are my 1996 Watermaster reports and the proposed 1997 Budgets also the 1996 daily delivery records.

1996 was a good water year on the system and it looks like 1997 will be a well above average year also. We have been discharging water out of the dam since the 3rd of January and it looks like we will be running water all winter.

We have set our watermaster election and annul meeting for the 3rd of March. Also as a part of that meeting we will have a report from JUB Engineers on the feasibility of putting the whole system in a pressurized pipeline.

If you need any more information please feel free to contact me.

Regards

Bob Simpson
