REASONABLE TO ASSUME: IF August use is MARGINAL (± 0), THEN Edwards is not Adversely impacting FLORA @ problem times.

This suggests upon FLORA call for H2O: NO regulation (no curtailment, that is) @ Edwards if flow is minimal (≤ 18 gpm?). KEN N. CONCURS WITH THIS ASSUMPTION.

- ① Millions of gallons/month
- ② MEAN RATE/month in gallons/minute; ASSUMES CONTINUOUS FLOW 24 hrs/DAY.
- ③ Through 8/20/94
