RE Measuring Devices for Groundwater Diversions Dist #140

Petition for Reconsideration

Background

Beginning in 1992 I started purchasing water from the Burley Irrigation district to replace Ground water. Since that time I have converted totally to Sprinkler Irrigation. I have not pumped since about 1993. I have protected my water right by putting them in the water bank with the dept. of Water Resources.

The water purchases have been made thru South West Irrigation District. Although no water right has been granted, I see this arrangement continuing.

Because I am Not using my Groundwater Diversion I would request a variance of a closed Conduit Measuring Device because the installation and maintenance of the standard meter would be burdensome and unnecessary.

I understand your agency has 21 day to respond to this request. Please Call if you need Further information

Thanks for your consideration in this matter.

Yours Truly

Paul Christensen
