

CONVERSATION MEMORANDUM

DATE 6/13/94 8:00 amFILE ~~61-1~~ 61-DNAME OF PARTY Carlene Smith 366-2711EMPLOYEE Steve LesterRE: Follow-up to HER 6/10 CALL FOR Water:

I could not reach her Fri 6/10 p.m. but called this a.m.

Told her that the call for water was discussed with Watermaster, ROB Whitney & John Hamon. Info we have is that this is another case, as usually happens in 61-D, where futile call for water cannot be honored.

After much discussion etc. - she wanted to know who to appeal this to: I suggested DOT & she wanted to go beyond that. I then suggested NCG &/or RKH & S.O.

Following this, I contacted S.O. & passed info on to NCG & RKH. offices in case either of them are contacted.

BOTTOM LINE: ANOTHER FUTILE CALL FOR H₂O

EMPLOYEE Steve Loster

RE: Call about Water Delivery

- Carlene called - said
- 61-00299 ^{1/2 yr} - has #1 right 30"
 - been getting @ 15" this past week.
 - 61-00371 ^{1/2 yr} - Blackwell has #2 60" & had some type of transfer on this.
 - said Blackwell getting 15-20" now.
 - has contacted Dan Hall, Watermaster, several times with request to completely deliver #1 right to extent H₂O available but not getting any results.

Told her I'd try ✓ with RBW if available since he's familiar with system. via ~~that~~ ^{that} or other means, will see what Watermaster should do.

Follow-up

RBW. futile call situation as in past years. He ✓ with WM & found very little flow in creek. Smiths getting all available flow at their PR.

JOHN Homan - concerned with RBW & WM.

CALL Carlene → This is futile call & IDWR supports WM in this.
