CONVERSATION MEMORANDUM

Date 4/12/06

File Bennett Creek  
Water District

NAME OF PARTY Kathy Weston

EMPLOYEE J. Wostra

RE: Flooding on Bennett Creek.

- Ms. Weston called to discuss the recent flooding of her property on Bennett Creek downstream of the railroad grade. She stated that her grape vineyard was ruined along with her wine cellar. She was going to seek legal council (Bill Ruggert) for action for damages. She stated, that no one did anything to prevent flood such as cleaning railroad culverts regularly outlets of dams upstream. - Reynolds, Dilworth, Orelono. She said the cleaning of the railroad culverts let a 3 ft wall of water over her property. The creek has moved back downstream. I responded, the Dept. does not regulate the creek flows or storage management upstream. Flooding from upstream is not controllable - Reynolds.
- We had followed up on her call concerning the Dilworth dam storage earlier. - Board height was OK.
