JAMES E. RISCH  
Governor

KARL J. DREHER  
Director

June 28, 2007

Delmas W. Johnson, P.E.  
Physical Facilities Department  
50 E. North Temple Street. Rm. 1205  
Salt Lake City, UT 84150-6320

Dear Mr. Johnson:

Tim Luke forwarded me your letter dated May 31, 2007 and asked me to provide a response. In your letter, you ask for a 90-day extension to file plans to comply with the February 20, 2007 order requiring controlling works and measuring devices in Water District No. 170. It is clear from your letter that you intend to comply with the order and are working toward that end. The Department is willing to allow the requested additional time to submit the required plans. Please provide the required plans to IDWR no later than August 30, 2007.

Although I am not familiar with the specifics of your well, in most cases the most accurate way to measure usage from a groundwater well is with an inline flow meter. You are free to determine the measurement method that best fits your situation, but in case you are considering a flow meter, I have attached a short list of manufacturers of controlling works and measuring devices, including a list of manufacturers and distributors of inline flow meters. Please note that this is not a complete list, and IDWR does not endorse any particular manufacturer or distributor, but this list can be a good starting point.

Please feel free to contact me if I can be of any help or if you have any questions regarding this issue.

Sincerely,

Nick Miller, P.E.  
Water Distribution Section
