June 2, 2008

David R Tuthill JR., P.E.

In accordance with the order dated April 7, 2006 concerning the installation of measuring devices at points of diversion as listed on attachment B of the order and in accordance with Paragraph 1c of the order Little Wickiup Ranch LLC hereby requests an exemption of compliance on points of diversion on the East Fork and Little Wickiup Creek.

The East fork diversion, Water Right Number (72-219c), has an allotted right of .85cfs. It currently has install a lockable headgate and a fish weir that controls the water volume. It could be calibrated for measurement if required.

The Little Wickiup Creek diversion, Water Right Number (72-219a), has an allotted right of 0.18cfs. While it does water approximately 6 acres the volume is well below the 0.24cfs limit. Currently the water is used with a gravity flow sprinkler system, which has measurable pressure and sized orifice sprinklers to meet the flow control.

My apologies for the late letter requesting an exemption, however since December 2007 I have been undergoing cancer treatments which has interfered with my normal business routine.

I respectfully request an exemption to installing measuring devices at these points of diversion.

Yours truly,
Little Wickiup Ranch LLC
