Re: Water Right Nos.: 72-7532 (Nagy), 72-15814 (BLM)
Lime Creek Allotment

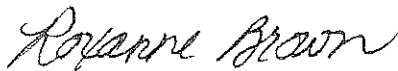

Dear Ken:

We recently discussed your diversion from Lime Creek under water right 72-7532. Thanks for your cooperation while we delivered water to the BLM stockwater right downstream from your pond. It is my understanding the cattle will no longer be on the Lime Creek Allotment after July 10th of this year. I would ask that you coordinate this with Leigh Redick at BLM (208-879-6205), or BLM's lessee, before opening your headgate.

In the future, please coordinate the use of your water from Lime Creek with either BLM or the lessee, depending on which they prefer. In that way, they can be assured their senior water right will be delivered, and you will know exactly when to exercise your right.

Thanks again for your cooperation. Please let me know if you have any questions.

Sincerely,

Roxanne Brown
