This workbook was prepared by Nick Miller of IDWR on May 29, 2008. This list includes active irrigation surface water water rights, adjudication recommendations, and permits with points of diversion within the Bohannon Creek Drainage. Recent and future water right transfers, new permits, ownership changes, and corrections to IDWR records may not be reflected in this list.

The list is sorted by point of piverson, then by priority date. Note that a water right may have more than one record due to multiple points of diversion.
