

SKIP,

I CAN NOT WRITE A REPORT ON THE WELL IN BASIN 73
BECAUSE I GOT DACK TO WORK TO A COMPLETELY USELESS
COMPUTER.

WHAT I FOUND AT THE WELL WAS:

1. AT THE TIME OF MEASUREMENT A TOTAL OF 4.06 CFS
WAS BEING DIVERTED FROM THE WELL THIS INCLUDED 3.24 CFS
GOING TO TWO SMALL DIVOTS AND 0.83 CFS DIVERTED TO
5 SPRINKLERS AND A DITCH

2. THE ACRAGE FOR THE DIVOTS EQUALS 271 AND SOME
CORNERS THAT AMOUNTS TO A VERY ROUGH ESTIMATE OF 20
FOR A TOTAL OF 291 ACRES BEING IRRIGATED. THIS DOES
NOT INCLUDE THE 80 ACRES THAT WAS BEING IRRIGATED
FROM THE DITCH THAT THE WELL WAS SUPPLYING WATER.

I CAN WRITE A BETTER REPORT TUESDAY IF MY COMPUTER
IS OPERATIONAL. IF MY COMPUTER IS NOT OPERATIONAL BY
THEN, I WILL NOT BE IN A GOOD MOOD SO YOU MAY
NOT WANT TO TALK TO ME. IF CHUCK HAS RUINED
A SUMMERS WORTH OF WORK I MAY JUST GO ON
VACATION FOR AWHILE. :)

LEW
