SALMON, ID. 83467**

Jan. 8, 2008

To: Idaho Department Of Water Resources.

As Water Master of Dist 74 I would like to make a request of the Dept. of Water Resources. Currently I measure all of the diversions in Dist 74 with a Swiffer flow meter. I have staff gauges fixed to the IDFG fish screens and have attempted to have rating curves. It is impossible to rate these diversions because of (moss, laterals, ditch maintenance, etc) below these staff gauges.

I would like for the Dept to issue an order to the water right holders of these diversions to have proper in stream measuring devices installed by irrigation season 2009. These diversion are locally called (L-1, L-2, L-8, L-8A, L-14, L-20, L-24, L-26, L-27, L-28, L-31A, L-34, L-37, L-39, L-40, L-43, L-43A, L-45A, L-45B, L-45D, L-51, L-51A, L-52) . Attached is a list of the users on each of the diversion. These diversions were selected as per the lowest raked on my list. I will be requesting another additional list for 2009 at a later time.

If you have any questions you can contact me on my Cell (208) 303-7449.

Thank You

Rick Sager
