Re: Water District 36A Water Right Lists

Dear George:

Enclosed are four new water rights listings which I hope you find useful in compiling your budget list. These lists are similar to the ones I had previously sent you, but are more updated and should provide you with better cross references. The lists are as follows:

- 1) an administrative water rights data base listing (i.e.; original decreed rights and licenses etc.) sorted by water right number only;
- 2) an administrative water rights data base listing sorted by source first, then by water right number (same as earlier list I sent you but includes additional rights and updated SRBA comments).
- 3) an adjudication directors report listing sorted by source and water right number (same as previous adjudication list except that it includes additional rights and multiple points of diversion).
- 4) an adjudication directors report listing for Billingsley and Riley Creeks only, sorted by water right number and containing the diversion name.

Also included is a director's report listing of all disallowed claims. This list gives the names and addresses of claimants with disallowed claims and will provide you with an additional reference to the administrative water rights listings.

I hope these lists will help you. I did not create the one type of list which we had discussed at our last meeting which was to have the original water right number and name along side the present adjudication number and name. This latter type of list is not easily produced by computer and would have been to laborious and time consuming to produce by manual editing. I think that you should be able to come up with your final water rights list for budgeting purposes by using the newer lists which I have enclosed.

Once you have identified and/or matched the water right numbers, names and diversion rates, please contact me and we can discuss how

to produce your budget report. We may be able to save you some time and grief by using our computer and data entry resources. Contact me at 327-7864 if you have any questions or if you need further information.

Sincerely,

Tim Luke
