Idaho Dept of Water Resources
ESPA Spring Diversion Inventory

District 36A **Date** 7/12/04

Basin 36 **Ditch or users association**

Diversion Name Padgett ditch **POD Number** 410010

Spring Name **Tributary to**

GPS site ID 40001537 **Inventory Examiner** C. Knowles

Owner Cliff Jensen (contact) **Operator**

Measuring Device Data			
Type of Device or Method	4' Contract Rec weir	(Standard)	Non-standard
If non-standard describe:			

Discharge and Measurement Method	
How Measurement was taken: (Staff gauge, current meter, polysonic meter)	S.G.
Staff gauge Head Reading .51	(Current Meter) or poly-sonic measurement: 4.84 cfs 7/13/04
Time of Day 14:40	
Table used for Q ~~#39~~ 47-2	Meter Measurement Confidence 2% 5% 10% +10%
Total Flow = 4.73 gb 3.54 CFS	Does device meet IDWR standards? (YES) NO
Discharge notes attached? YES (NO)	Measurement Taken by: T. Luke/L. Bab
Calculations Attached? YES (NO)	Is follow-up Needed? YES NO

Concerns about measuring device: Just above Padgett diversion a 1 HP end suction pump in ditch - spring above Motel is now dumping into Padgett just below diversion. Somewhat a trade due to conveyance issues. / 2 small diversions above measuring device. Some water is returned to creek after irrigation water is taken out.

On 7/13/04 - means 4.84 cfs using current meter, weir reading @ same time was 4.32 cfs; water was diverted upstream of weir.

Current meter measurement

Site: Padgett Ditch
Date: 7/13/2004
WMIS ID: 410010
Source: Billingsley Creek

Staff gage readings: 0.48 feet @
feet @

Meter type: 4-foot contracted rectangular weir
Rating curve: Standard contracted rectangular weir formula
Meter discharge: 4.32 ft^3/s

Measured approximately 100 feet below the headgate, there are two small diversions between the current meter location and the weir. This measurement is intended to measure the total diversion, not calibrate the weir.
