**RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND
TRIBUTARIES**

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Sincerely,

Nick Miller, P.E.

**RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND
TRIBUTARIES**

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Sincerely,

Nick Miller, P.E.

RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND TRIBUTARIES

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

**RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND
TRIBUTARIES**

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Sincerely,

Nick Miller, P.E.

**RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND
TRIBUTARIES**

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Sincerely,

Nick Miller, P.E.

**RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND
TRIBUTARIES**

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Sincerely,

Nick Miller, P.E.

**RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND
TRIBUTARIES**

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Sincerely,

Nick Miller, P.E.

**RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND
TRIBUTARIES**

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Sincerely,

Nick Miller, P.E.

**RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND
TRIBUTARIES**

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Sincerely,

Nick Miller, P.E.

**RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND
TRIBUTARIES**

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

**RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND
TRIBUTARIES**

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Sincerely,

Nick Miller, P.E.

RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND TRIBUTARIES

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Sincerely,

**RE: ORGANIZATIONAL MEETING OF WATER USERS ON THE EAST FORK AND
TRIBUTARIES**

Dear Water User:

This letter provides notice of a public meeting of water users to be held December 16, 2009 in Clayton, ID. The Purpose of the meeting is to discuss creation of an East Fork sub-district within Water District No. 170. A sub-district is an organizational unit within a water district that allows users in an area to elect and fund a local watermaster to provide watermaster services. Sub-districts allow users a greater degree of local control over water delivery and reduce or eliminate the need for those users to contribute to the costs of the larger district.

TIME AND PLACE:

When: 1:00 p.m. Wednesday, December 16, 2009

Where: Clayton Community Center, Clayton, ID

BACKGROUND/PURPOSE:

On April 6, 2006, the Director of the Idaho Department of Water Resources (IDWR) issued an order creating Water District No. 170 (WD170). WD170 was created to administer water rights from the Salmon River and tributaries (including groundwater) upstream of the confluence with the Pashimeroi River. Because WD170 encompasses such a large geographic area, the order creating WD170 anticipated that a number of sub-districts could be created within the larger district to facilitate administration, limit costs associated with the district, and provide a level of local control. The meeting in Clayton is held to discuss whether water users from the East Fork and tributaries want to pursue organization into a sub-district within WD170.

IDWR has agreed to provide watermaster services for WD170 for a limited initial period, after which users will elect and fund a WD170 watermaster. Currently, the WD170 Watermaster is performing the measuring and reporting duties in the East Fork area and is funded by IDWR. Although IDWR will continue to provide watermaster services for WD170 during 2010, the costs associated directly with measurement and reporting in some parts of Basin 72 will be funded by the users starting in 2010. Organizing into a sub-district will provide the East Fork users more control over the cost of performing those activities.

Furthermore, the Director of IDWR has stated that when IDWR no longer provides watermaster services to WD170 free of charge, users in a functioning sub-district will not be required to fund the budget to operate WD170. In other words, users in a functioning sub-district will be responsible only for funding that sub-district and will not incur additional costs to fund the larger district.

If a sub-district is not created in the East Fork area, the WD170 watermaster will hire additional staff to perform the measurement and reporting in that area starting in 2010. The budget to fund the additional staff will be collected from users through assessments by WD170.

WHAT TO EXPECT FROM A SUB-DISTRICT:

A sub-district is essentially a semiautonomous organization responsible for administering water rights within a defined area of the larger district. As the sub-district is a part of the larger water district, the sub-district watermaster would report to and be supervised by the WD170 watermaster. A sub-district would organize and operate similar to a water district, as provided in Chapter six of the Idaho Code. If a sub-district is created, users will hold an annual meeting each spring to adopt a budget and elect a local watermaster to perform measurement, reporting, and regulation duties associated with day to day operation of the district. The budget will be collected from water users within the sub-district based on each user's proportional use of water. The budget may be large or small, depending on the level of service the users choose to fund and the details of the sub-district operation.

If the users at the December 16, 2009 meeting decide to pursue forming a sub-district, the Director of IDWR will schedule a public hearing and will notify each water right holder in the proposed sub-district of the time and place of the hearing. The hearing provides an opportunity for affected users to provide input on the creation of the sub-district. After the public hearing is held, the director considers the input received at the hearing and any written comments submitted after the hearing and will issue an order creating the sub-district if he determines it is appropriate to do so.

Questions, concerns or needs related to the scheduled meeting may be directed to Nick Miller at 208-287-4956, or by e-mail at Nick.Miller@idwr.idaho.gov. You may also contact Bob Foster at the IDWR Field Office in Salmon, Idaho at 208-756-6644, or by e-mail at Bob.Foster@idwr.idaho.gov.

Sincerely,

Nick Miller, P.E.
