Re: invoice no. 2010006

Water right 71-7113

The invoice states that it is for "Watermaster services for water rights 71-7113". I have several issues with this statement.

1. I have a private, domestic well. I receive NO services from the watermaster, or any one else with the IDWR.
2. The water right is still listed as being split between three different properties. You should have received a letter requesting that this be changed.
3. In a letter dated June 15, 2009, I received a bill for both water rights 71-7113 and 71-7180, that stated the total estimated usage (in 24-hr ft<sup>3</sup>/s) was : **8.61** .

The invoice dated June 14, 2010, states usage as 7.1 (24 hr second feet).

Why the discrepancy? And why does my water right report state that my diversion rate is 0.060 csf? Where do all these different numbers come from?

I look forward to having these issues explained to me.
