Re: Water District 73 water rights

Dear Ted,

The majority of the water rights in your district have been decreed in the Snake River Basin Adjudication (SRBA) and the SRBA Court has granted a motion by the Idaho Department of Water Resources (IDWR) for interim administration of water rights in Basin 73. As such, IDWR is providing you with a current list of water rights in your district. The rights on the attached lists are the currently active water rights, permits, and recommendations in your district. This list supersedes any previous list and should be used from this point forward as a basis for water delivery in the district.

I have attached the water right list in two formats. The first is sorted by water source, then by priority date. The second is sorted by the current water right owner name as recorded or last updated in IDWR records and then by priority date.

The printed lists do not include small domestic and stockwater rights and also exclude the fish bypass rights held by the Idaho Department of Fish and Game. However, I will transmit to the district (via email) a Microsoft Excel workbook that contains these rights and also contains descriptions of the points of diversion for the water rights.

Please review the water right list thoroughly for accuracy and content. It is possible that a few rights may have been omitted for various database related reasons or problems. Also, a few water right licenses could be included on the list that perhaps should not be included because no SRBA claims were filed, or for other reasons. We believe omission of any water rights or incorrect inclusion of any rights is very minimal, if at all. If you find errors, have questions or concerns, or need further assistance, please contact Tim Luke or me directly at 208-287-4956.

Sincerely,

Nick Miller, PE
Engineer, Water Distribution Section

Cc: IDWR Eastern Region
