October 30, 2009

Lemp Ditch
Attn: Toby Williamson
856 E. Williamson Ln.
Eagle, Idaho 83616

Dear Mr. Williamson:

Water District #63 sent you a letter dated July 15, 2009 regarding measurement of your diversion. As of this date we have not received any correspondence from you about your plans to provide an accurate form of measurement to Water District #63.

The State of Idaho requires all diversions from the Boise River to be measured.

Failure to comply with this requirement could result in a curtailment of your water right until a satisfactory form of measurement has been installed.

Please contact me or leave a message at (208) 908-5480 to discuss options for measuring your diversion.

Sincerely,

Rex R. Barrie
Boise River Watermaster
