RE: Controlled Fill of Nahas Reservoir

Dear Sirs:

We will once again have to do a controlled fill of the Nahas Reservoir for the 2009 irrigation season. I measured the depth on this day as being 40 inches from full. The past history of what we have done in years past is contained in our file. The increase requested by your dept. in our delivery system has been started and will be completed by the time it is needed. This will hopefully make the controlled fill much more efficient and able to be completed in a more timely manner.

If you have any questions please contact me at 834-2533.

Sincerely,
Craig Baker
