Re: Submittal of 1995 Water Measurement Reporting Forms

Dear Mr. Jones:

The Department wishes to remind you that you must complete and return the 1995 water measurement reporting forms to IDWR on or before January 15, 1996. Enclosed is a copy of the original report form or forms which we sent to you earlier this year. The attached copy (or copies) has been included only as a matter of convenience or in case the original has been misplaced. Diversion of water in 1996 is conditioned upon submittal of your report.

You are also reminded that each reporting form shall be accompanied by a report processing fee in the amount of twenty (\$20) per diversion made payable to the Idaho Department of Water Resources.

Note that I have enclosed report forms for the Hoagland Ditch and the commingled Weatherby Tunnel pipe-Upper Three Springs pipe diversions. I do not believe that there is any way for you to report measurement of these diversions since measuring devices were not installed. However, you must still return the reports and verify that measurements either were or were not taken. The Department will likely issue a Notice of Violation for these diversions if the reports are insufficient and/or indicate a violation of measuring and reporting requirements as established by IDWR's order of December, 1994.

If you have questions about the water measurement report forms, please contact me directly at 208-327-7864. Thanks again for your cooperation.

Sincerely,

Tim Luke

Tim Luke
