NATIONAL FISH HATCHERY  
3059-D NATIONAL FISH HATCHERY ROAD  
HAGERMAN, IDAHO 83332-5851

March 31, 1994

Mr. George Lemmon  
Watermaster  
2727 South 1050 East  
Hagerman, Idaho 83332

Dear Mr. Lemmon:

Between March 18 and March 31, I have made daily observations of water, originating from the Len Lewis Spring, spilling at the Hagerman Wildlife Management Area. Today, March 31, 1994 I measured the amount of water spilling to be 2.9 cfs. In addition, I have observed other instances of Brailsford Ditch water not being put to apparent beneficial use.

I am, therefore, calling for you to immediately turn back this 2.9 cfs to the Hagerman National Fish Hatchery, so that it may be put to beneficial use. Furthermore, I request that you immediately investigate whether all other water is being put to beneficial use. If your investigation reveals that any other amount of water is not being put to beneficial use, I request that this water also be turned back to the Hatchery without delay.

Sincerely,

  
Bryan Kenworthy  
Project Leader
