# WATERMASTER'S REPORT

From April, 20 19 To Sept., 20 19

Water District No. 13-M

Name of Watermaster Von Gregersen

Mailing Address 3129 W. 7200 N. Preston ID. 83263

### AFFIDAVIT OF WATERMASTER

STATE OF IDAHO )  
COUNTY OF Franklin ) ss.

Von Gregersen, being first duly sworn, deposes and says that he/she is Watermaster of Water District 13-M, having been lawfully appointed by Gary Spackman, Director, Idaho Department of Water Resources, and that the volumes of water, as stated in this report and prorated by him/her to the water right holders of the district are correct.

Von Gregersen

(Deputy) Watermaster District No. 13-M

Subscribed and sworn to before me, this 4th day of January, 20 2020

(SEAL)

Shauna T Geddes  
Notary Public

My Commission expires 11-16-2024

Boise, Idaho \_\_\_\_\_, 20 \_\_\_\_\_

I HEREBY CERTIFY, that \_\_\_\_\_ was lawfully appointed by me as Watermaster of Water District No. \_\_\_\_\_, and that the information contained in this report, as herein sworn to, is, to the best of my knowledge and belief, correct.

\_\_\_\_\_  
Director, Department of Water Resources

By \_\_\_\_\_

**WATERMASTER'S DAILY RECORD**

SOURCE Stockton Creek

WATER DISTRICT 13-M

MONTH(S) OF Apr. - Sept., YEAR 2019

WATERMASTER Van Gregersen

ADDRESS 3129W. 7200 N. Preston Id. 83263

RECEIVED

JAN 08 2020

Department of Water Resources  
Eastern Region

After the irrigation season the Watermaster must forward record keeping information and the annual Watermaster report to the appropriate IDWR Regional Office

SCANNED:  
JAN 31 2020

## Rules for Record Keeping

1. Use the daily record book or personal spreadsheet.
2. Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
3. If the Water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or head gate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and head gate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
4. If the water being delivered is not actually measured, enter an "E" in the grid space under the column meas method for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of non delivery.
6. A blank grid space; means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
7. If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference. If there are multiple rights at diversion, please list the most senior right first. You may supplement this book with a list of water rights by priority for each diversion.
8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream right holders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.
9. If necessary or requested, watermasters should submit a separate water rights list or reference sheet that associates water rights with current owners or diversion names.

## REMARKS

4-28-19 Good snow pack & Spring rains - Miller Pond 10 inches from spilling over.  
5-17-25th lots of rain  
July - Glen Merrill & Brent Abbott adjusted more than normal to reduce Flooding etc.  
Sept. - Turned more to Miller Pond to fill - lots of Early rain slowed irrigation.

**WATERMASTER'S DAILY RECORD**

SOURCE Battle creek

WATER DISTRICT 13-M

MONTH(S) OF Apr. - Sept, YEAR 2019

WATERMASTER Van Gregersen

ADDRESS 3129 W. 7200 N, Preston Id. 83263

RECEIVED  
JAN 08 2020

Department of Water Resources  
Eastern Region

After the irrigation season the Watermaster must forward record keeping information and the annual Watermaster report to the appropriate IDWR Regional Office

SCANNED  
JAN 31 2020

## Rules for Record Keeping

1. Use the daily record book or personal spreadsheet.
2. Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
3. If the Water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or head gate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and head gate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
4. If the water being delivered is not actually measured, enter an "E" in the grid space under the column meas method for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of non delivery.
6. A blank grid space; means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
7. If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference. If there are multiple rights at diversion, please list the most senior right first. You may supplement this book with a list of water rights by priority for each diversion.
8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream right holders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.
9. If necessary or requested, watermasters should submit a separate water rights list or reference sheet that associates water rights with current owners or diversion names.

## REMARKS

4-23-19 Treasurton Res (No. 1) is Full - Filled naturally  
5-3-19 Strongman No. 2 - Full  
5-17-27th lots of rain  
7-28 - Wier removed due to re-routing stream  
Below No. 1 to allow for work on the dam - Finished  
the irrigation season with out it.  
Sept - Early rains Halted work on the dam - most  
Irrigating stopped also.

## WATERMASTER'S DAILY RECORD

SOURCE Cottonwood Creek

WATER DISTRICT 13-M

MONTH(S) OF Apr. - Sept, YEAR 2019

WATERMASTER Von Gregerson

ADDRESS 3129 W. 7200 N. Preston Id. 83263

RECEIVED  
JAN 08 2020  
Department of Water Resources  
Eastern Region

After the irrigation season the Watermaster must forward record keeping information and the annual Watermaster report to the appropriate IDWR Regional Office

SCANNED  
JAN 31 2020

## Rules for Record Keeping

1. Use the daily record book or personal spreadsheet.
2. Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
3. If the Water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or head gate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and head gate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
4. If the water being delivered is not actually measured, enter an "E" in the grid space under the column meas method for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of non delivery.
6. A blank grid space; means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
7. If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference. If there are multiple rights at diversion, please list the most senior right first. You may supplement this book with a list of water rights by priority for each diversion.
8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream right holders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.
9. If necessary or requested, watermasters should submit a separate water rights list or reference sheet that associates water rights with current owners or diversion names.

## REMARKS

4-28-19 No usage yet Good stream Flow + spring rains  
5-13-20th lots of rain

RE: Watermaster's Report; WD 13M

Dear Von,

The Idaho Department of Water Resources has received your 2019 Watermaster's Report.

It is available for viewing and printing on our website at <https://idwr.idaho.gov/water-rights/water-districts/active.html> under "Documents" to the far right of your listed district.

If you require assistance locating your documents online, please contact Cher Ramos at 208-497-3779.

Kind Regards,

A handwritten signature in black ink that reads "Cher Ramos". The signature is fluid and cursive, with the first name "Cher" being more prominent than the last name "Ramos".

Cher Ramos  
Technical Records Specialist
