## WATERMASTER'S ANNUAL REPORT

From:	1-12	, 20 2 (	То:/-	-//	_, <sub>20</sub> _22_
Water Distri	ict No. 02	_			
Water Distri	ict Name: Milne	r to N	Irphy		
Name of Wa	atermaster: Rob	Whitne	-Y		
Mailing Add	iress: IDWR	State	office	Boise	

#### **AFFIDAVIT OF WATERMASTER**

As the appointed watermaster of water district no. \_\_\_\_\_\_, I hereby certify that the information contained in this report is true and correct to the best of my knowledge.

1-1-22

Watermaster signature

Date

Pursuant to Section 42-606 Idaho Code, this Watermaster's Annual Report shall be filed prior to the end of the watermaster's appointment for the current year, and kept in the office of the Idaho Department of Water Resources (IDWR). The Watermaster's Daily Diversion Records should be attached to this report if those records are not submitted electronically to IDWR.

# Water District 02 (Milner to Murphy) 2021 Annual Delivery Report and Watermaster's Report

### **OVERVIEW**

Water District 02 (WD02) administers diversions of water from the Snake River below Milner Dam to the Murphy Gage below Swan Falls Dam. Figure 2 in Appendix A shows the distribution and geographic extent of WD02 diversions. There are 52 diversions equipped with radio telemetry and dataloggers. Five additional diversions are equipped with dataloggers only. Dataloggers record diversion or discharge rates at the larger diversions in WD02. Discharge rates are expressed in cubic feet per second (cfs).

Totalized volume data for diversions are presented in Table 1 (acre feet and 24 hour cfs). Average daily diversion rates (cfs) for sites with dataloggers are presented in Appendix B. The proration of assessments to be billed to the individual water users in February of 2022, is based on the five-year average of the volumes of water delivered in 2017, 2018, 2019, 2020, and 2021 (presented in this report).

WD02 and IDWR staff efforts during 2021 included:

- collecting data at all measured diversions three times in 2021;
- closely monitoring river flows at the Murphy Gage and frequent reporting of diversion data;
- correcting telemetry station and measuring device issues;
- reviewing and documenting Water Supply Bank transactions; and
- ensuring diversions within the district do not exceed the limits of applicable water rights.

## DATA

Some data gaps occurred in 2021 and missing measurement data was estimated and added to the total volume diverted.

The cumulative total of both measured and estimated diversions was approximately 529,784 acre-feet during 2021 (about 10,220 acre-feet more than 2020).

WD02 2021 Annual Report Page 1 of 24 The totalized volume shown in the Average Daily Diversion Rate reports (Appendix B) may differ from the volume shown in Table 1, because the volumes in Table 1 include estimations for missing data. Volume totals for water rights having a year-round season of use are accrued between November 15 and November 14 of each year, more or less. Average Daily Diversion Rate reports were created using Aquarius-Time Series Software and are presented in alphabetical order by diversion name in Appendix B.

### **2021 FLOWS AT MURPHY GAGE**

According to U.S. Drought Monitor, the 2021 Water Year saw the driest spring since 1924 and the hottest June and July on record. Unadjusted Average Daily Flows (UADF) on the Snake River at the Murphy Gaging station were provided by the USGS surface water data for Idaho (USGS, 2021). Adjusted average daily flows (AADF) were calculated by IDWR staff using the reservoir-stage method to compensate for fluctuations caused by hydropower operations of Idaho Power. On March 28, 2021, the three-day moving average of the AADF was 5,935 cfs, or 335 cfs from the Swan Falls minimum threshold of 5600 cfs. On June 27<sup>th</sup>, 2021, the three-day moving average of the AADF was 6,930 cfs. A three-day moving average of the AADF was 4,244 cfs, or 344 cfs from the minimum threshold of 3900 cfs. A three-day moving average of the AADF was calculated and is reported in Figure 1 consistent with the Final Order issued October 27<sup>th</sup>, 2014 (DWR, 2014).

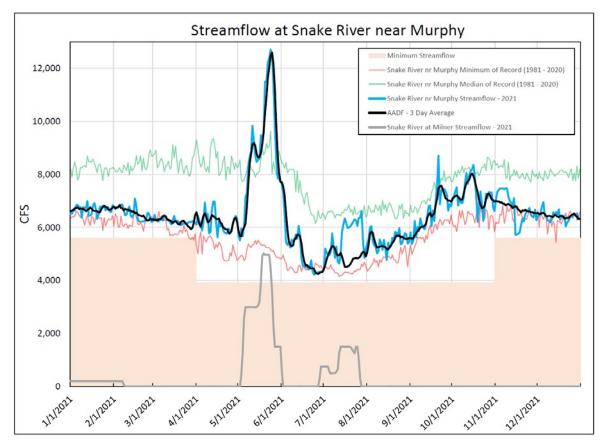

Figure 1. Hydrograph of Snake River below Swan Falls Dam. Unadjusted Average Daily Flow (UADF) in blue, 3 day average of Adjusted Average Daily Flow (AADF) in black, and Minimum Stream Flow for 2021 at Murphy Gaging station.

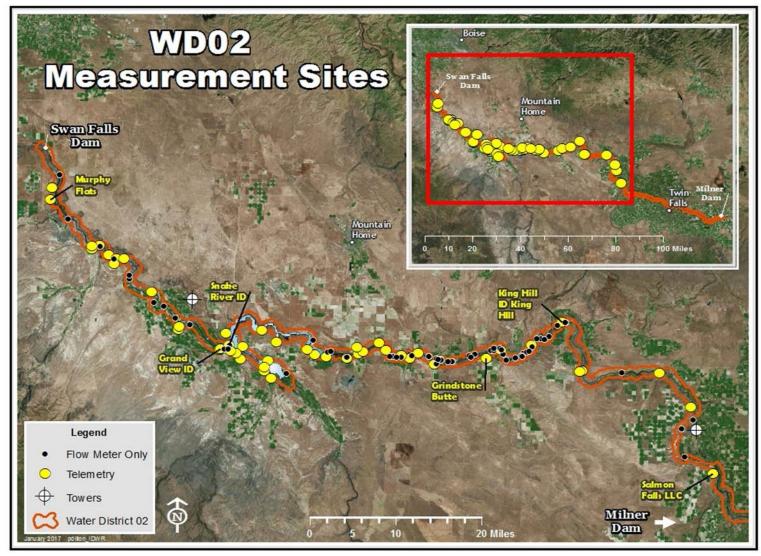

Figure 2. Map of Water District 02 boundaries and measurement sites.

WD02 2021 Annual Report Page 22 of 24

### **APPENDIX B:** Average Daily Diversion Rate Reports for Water District 02

This appendix shows diversion data for measurement locations equipped with a datalogger. The totalized annual volume in these reports may differ from that reported in Table 1, as the reported volumes in Table 1 include estimates for missing data. The reports in Appendix B show the average daily diversion rates throughout the irrigation season for each of these diversions. Average daily diversion rates are in cubic feet per second (cfs) and the total volume is in acre-feet (AF).

These reports were created in the Aquarius-Time Series Software and are presented in alphabetical order by diversion name.
