*See Jeff & Angie*

Hi Brandi:

We'll see you on Monday, March 16 about 11:15 at the IDWR Water Center in downtown Boise for a brief introduction & visit with a few key people here who can give you a hand this year. We can talk about making some progress for upgrading measurements etc. for WD 67. Then lunch is on us!

Attached shows general idea of getting there: From Interstate 84, take city center freeway exit & follow it all the way, no turns, until get downtown, continue straight past Capitol Blvd, keep going & turn left on Avenue A immediately past Winco (Julia Davis Park will be on your right). Then 2 blocks straight shot into parking area. Use underground parking on right side, that will be beneath the Water Center building. Take elevator to 6<sup>th</sup> floor, meet in lobby.

A closer view of the location is seen at our website under "contact us" link.

If you overshoot Avenue A, just continue a short way to next light & turn left on Broadway, go 1 block and then left on Front Street, far right lane will take you 1 block to light at Avenue A, turn right into parking area.

We'll cover any parking cost (pay on way out, not in way in).

Looking forward to seeing you then. Let me know if you need anything before that.

Regards,

Steve

p.s. if needed when getting to the Water Center, call Water Center front desk for help, 287-4800.
