WATERMASTER'S REPORT

FEB 24 2014

Department of Water Resources
Eastern Region

From January, 2013 To December, 2013

Water District No. 11

Name of Watermaster Josh Hanks

P.O. Address 85 Crayon Court Logan UT 84321

AFFIDAVIT OF WATERMASTER

STATE OF IDAHO

} ss.

COUNTY OF

Josh Hanks

Josh Hanks, being first duly sworn, deposes and says that he is Watermaster of Water District 11, having been lawfully appointed by _____, Director, Idaho Department of Water Resources, and that the volumes of water, as stated in this report and prorated by him to the water right holders of the district are correct.

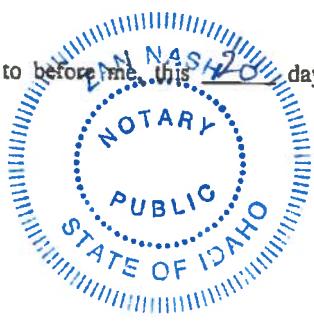

John Young

(Deputy) Watermaster District No. 11

Subscribed and sworn to before me, this 20 day of February,

20.14

(SEAL)

My Commission expires 3-10-2020

✓ 100% ✓

Notary Public

I HEREBY CERTIFY, that Vick Hawks was lawfully appointed by me as Water Master of Water District No. 11, and that the information contained in this report, as herein sworn to, is, to the best of my knowledge and belief, correct.

Beise, Idaho, Feb 29, 2014

Sergio Shackman
Director, Department of Water Resources
Dennis Brown

Section 1 – General Summary & Comments

Data within this report has been provided by IDWR, PacifiCorp and Watermaster records.

Watermaster Comments

This has been my first year as the Bear River watermaster. I would like to thank the previous watermaster, Rock Holbrook, for his help and guidance throughout this water season. This was a challenging year, especially for the central division water users. I thank everyone for their patience and willingness to work with me as I learned my duties and did my best to measure and record usage, and regulate when required. In the central division we were in regulation from the beginning of the season. I appreciate those that worked with me from the Bear River Commission, IDWR and from the State Engineer's office in Wyoming to make sure that regulations were made in an accurate and timely manner.

The natural flows in the Bear River, below Bear Lake, were also very low this season and required a lot of focus. I believe that everyone involved did a very good job of working with each other to make sure that the water was delivered, measured and reported in the most appropriate way possible. I would like to thank Liz Cresto with the IDWR for her help and patience as I learned the procedures to report and account for the water being delivered. I look forward to the 2014 water season and the opportunity to continue working with water users and other groups that manage and use the water within the Water District. It looks like the coming season will be as challenging as the 2013 season and I am optimistic that we will have another successful season in spite of the drought.

Alexander Reservoir drawdown and refill occurred during this irrigation season, the last foot was refilled in October. This was done for irrigation purposes.

Cutler Reservoir drawdown began in mid-October and will remain down until early 2014.

2013 Bear Lake Water Supply

Bear Lake Beginning Elevation on 10/01/2012 was 5915.90 ft.

Rainbow Inlet Canal Discharge – 69,800 Acre feet (27% of Normal)

Bear Lake High Elevation 06/01/2013 was 5917.20 ft.

Bear Lake High Storage – 970,690 Acre Feet (68%)

Bear Lake Storage Release – 209,000 Acre Feet
(includes releases made through October 11th for Bear River Canal Company)

Bear Lake Ending Elevation – 09/30/2013 was 5912.69 ft. (47%)

2014 Scenario

The 2014 irrigation allocation could still be the maximum amount if spring runoff results in a Bear Lake max elevation above 5914.7 ft. The full allocation of 245,000 af minus delivery losses would be 236,303 af. Under a worst case scenario, assuming a 1 foot increase from the fall low, around 220,000 af would be the allocation for the 2014 irrigation season.

If natural flows are similar to the 2013 amounts we will need to be watchful of the total storage delivery used throughout the season to prepare for another close year end.

2013 Water Delivery Cost

107,043.3 CFS total delivered for irrigation and 517,055 CFS delivered for power generation. Total delivered for 2013 season in 24 Hour Second Feet is 624,098.3 with \$68,769 total expenses.

Cost per 24 hour second foot delivered = \$0.11

Telemetry System and Website

Due to an issue with cellular coverage in the Pagram area the bearriverbasin.org website did not receive updates for the diversions in that area for the 2013 season. I have found a spot on a peak in that area that has cellular coverage and have obtained permission to relocate the cellular repeater station to that peak so that for the coming season we will once again have website updates for Miller, Nuffer, and Jensen water diversions in the Central Division.

Section 2 - Individual Diversions Report

Note: The numbers are the IDWR SiteID numbers.

#10043105 Miller Ditch

#10043110 Rigby Pump

#10043120 Nuffer Canal

#10043140 Sorenson Ditch

The Sorenson ditch still requires a measuring device. The water users will be reminded of the need to install a device before water is delivered this coming season.

#10043150 Ure North Hills Diversions

The diversion has a rudimentary head gate that is not lockable at this time, and there is no measuring device installed. The water user will be reminded that a measuring device will need to be installed before water is delivered this coming season.

#10043180 Lloyd Ditch

#10043160 Jensen Ditch

The ditch is in need of repair near the head gate, the flow meter is currently covered in soil and will be retrieved and re-installed in March or early April. When the river is running low there is difficulty in diverting water into this ditch. The user also experienced issues with beaver dams this season.

#10044060 Dingle Canal

This ditch has an issue with accurately measuring flows when water is turned into a certain ditch that is nearer the measuring point. This season I plan to edit the program in the measuring system to account for the changes in flow when the water is turned down this ditch that is mentioned above.

#10044070 Ream/Crockett Canal

This ditch experiences diverting problems when the river level drops below a certain point. This season was a struggle at times to get water into the ditch.

#10044200 Black Otter

This ditch experiences diverting problems when the river level drops below a certain point. This season was a struggle at times to get water into the ditch.

#10044450 Preston/Montpelier Canal

This ditch experiences diverting problems when the river level drops below a certain point. This season was a struggle at times to get water into the ditch.

#10044450 Todd Lloyd Pump**#10044700 & 10044714 Larocco/Kent Pump****#10044800 Pug Ditch**

Dan Keetch mentioned how efficient his new piped system has been for getting water to his fields in comparison to the old way. He has been very happy with the changes.

#10045800 West Fork Canal

The measuring device is having issues with making accurate measurements. One major problem is that the gates are allowing water through cracks and gaps in the gate boards. There seems to be an issue with keeping the level sensors calibrated. I will focus this season on improving the system and suggesting any changes that may be necessary.

#10067831 Charles Kunz**#10047305 Wayne Kunz Pump****#10067705 Hardcastle Pump****#10067870 & 10067874 Paul Kunz Pumps #1, #2 & #3****#10067834 Steven Kunz Pump****#10067855 Dean Kunz****Storage contract - Allyn & Rhett Phelps Pump****#11-4033A & B Lyle Stephens Pumps & Clyde Cook****#10068205 Chris Christensen or Alleman Pump**

#10072550 Eight Mile

The area velocity meter on Pearl Creek seemed to fluctuate a bit out of normal operation this season, I will make sure it is functioning properly this coming season. The pump that is included down river for this site has a mag-meter and reported through the cellular link to the website very reliably this season. The combination of the area velocity meter and mag-meter makeup the flow reported for this site.

#10072550 Eight Mile 2 (formerly Robert Harris Pump)

A new pump and irrigation pivots were installed for this season. The user has installed a Seametrics mag-meter and all is functioning as required.

#11-00449/11-00531C Soda Golf Transfer

The flow was maintained by the City of Soda Springs and golf course crew. I visited the flume and checked the flow rate, when in the area, recording the flow and contacting users for maintenance.

#10078905 Soda Golf Pump**#10079600 Last Chance Canal****#10079800 Bench B Canal****#10080105 Gentile Valley Canal****#10080355 Wheeler Pump****#10080385 Matthews Pump (Wanlass Pump)****#10081650 & 10082550 Skabeland Pumps****#10083505 Panter (Fox) Pump****#10086950 Smith/Bosen Ditch**

I visited this site weekly to review and record flows through the parshall flume.

#10089820 Smith Pump**#10089880 Upper Riverdale Canal and Pump**

#10089850 Nelson Ditch

#10089950 Riverdale Irrigation Canal

#10089955 Higley Pump

#10089960 Riverdale/Preston Pump

#10089970 Lucia Pump

#10090250 West Cache Canal

#10091120 Hodges Pump

#10091110 Johnson Pump

#10091495 Griffith Pump (Bastion Pump)

The flow meter at this pump has failed and will need to be replaced. The water users have been notified.

#10091455 Floyd Jensen Pump

#10091460 Bear Grove LLC (S. Bobka Pump)

The mag-meter at this location will need a new battery for the coming season.

#10091563 Dave Bosen (old Inglet/Lamont) Pump

This mag-meter will need a new battery for the coming season.

#10091503 Bruce Lamont (old Inglet Lamont)Pump

#10092755 Carol Whitney Pump

#10092650 Cub River Pumps

This water user has made changes to how their system takes water from the main canal. The measuring device that was installed 2 years ago needs to be modified to account for water that is taken before the measurement point. I will work with Reagan Wheeler to make sure this diversion is measured and reported correctly for the coming season. There will most likely be an adjustment to how the site is measured and reported on the bear river basin web site.

#10092900 West Cache Pumps

Section 3 - Individual Diversions Flow Data

The data on the following pages is reported from the IDWR website. This data is collected throughout the water season by way of meters, dataloggers, and manual flow measurements.

Water Master

Treasurer

Connely Baldwin opened the meeting at 2:00 p.m. and asked for introductions, then nominations for meeting chairman. Joe Larsen moved to have Connely Baldwin act as Chair and Austin Moses as secretary.

Austin Moses read a summary of the minutes of the February 5, 2013 annual meeting. Bill Robison moved to approve, Paul Nelson seconded. All approved.

Advisory Board Election. Joe Larsen nominated the present board and added Steve Meeks to the board as a small irrigator. Paul Nelson seconded. All approved.

Water Master Election. Bill Robison moved to approve Josh Hanks as water master. Joe Larsen seconded. All approved.

Treasurer Election. Steve Meeks moved to retain Austin Moses. Paul Nelson seconded. All approved.

Josh Hanks presented the annual Water Master Report. He reported that everyone worked together with the reduced water supplies and thanked everyone for their help.

The coming year promises the same and he encouraged everyone to be considerate. Some measuring devices needed in the Peogram area. Some measuring devices needing repair and replacement this year. Joe Larsen moved to approve. Pete Petersen seconded. All approved.

Connely Baldwin reported on the Bear Lake storage. Storage level at 5912.53 feet at present. Level coming up slowly but about a middling year. Snow pack at 82% of average overall. Looks the same as last year. Encouraged everyone to conserve where they can. Update information is available at the bearriver.org site. Alexander reservoir is refilling as is the Cutler Reservoir. Pete Petersen questioned how the Bear River bird refuge is being handled. Connely responded that they are being ok and haven't made a call on their water rights. Paul Nelson asked about the Woodruff Narrows. Connely responded that it is a two stage fill. Up to a point they can fill, then they have to wait until Bear Lake comes up to 5911, then they can finish filling. Discussion of extra water to provide water for kayakers, which does not affect water delivery. Paul Nelson indicated that wells have been drilled in Wyoming that are affecting the Smith Fork flows and wondered if anything could be done.

Liz Cresto from IDWR talked of the water right accounting model. Starts at the Wyoming Border and goes to the Great Salt Lake. Presented the flow accounting program for 2013, listing storage and natural flows and remaining storage. New accounting program in different computer language is being worked on. Should provide an exact match to the old model. Should result in improved data management. It will go into the testing phase in 2014 and should be accepted. Craig Wilken asked if they could know before they start drawing storage water. Liz said they will have a projection available, but its accuracy is questionable. When flows from Wyoming drop too low, an emergency exists and flows need to be brought up to minimum, then Wyoming gets 43% and Idaho gets 57%. She also discussed depletion limits and new agricultural depletions. Supplemental rights were discussed and how they are allocated.

Jeff Peppersack gave an update on the Idaho adjudications at present and encouraged an adjudication for the Bear River. The preference of the adjudication court would be in the next few years so that personnel could be retained. Bill Robison asked if Jeff thought adjudication would be good for irrigators. Jeff responded that it will make transfers easier and realistic. It will be expensive and time consuming. Discussion continued on the advantages and disadvantages of the process as well as the differences between Wyoming, Idaho and Utah. Jeff presented proposed legislative updates from IDWR.

Austin Moses presented the financial statements for the previous year. The statements were approved. He also presented the proposed budget for the 2014 year. Paul Nelson moved to approve the budget. Bill Robison seconded. All approved.

Bill Robison commended Josh for the job he did during the past year.

Meeting adjourned at approximately 4:00 p.m.

Water District 11

Dear Watermaster:

Enclosed herewith is a copy of the Watermaster's Annual Report for the past season.

The same has been prepared by the watermaster and approved by this Department in conformity with Sections 42-610, 42-614 and 42-615, Idaho Code.

During the 1993 legislative session, the legislature enacted a new law which amends Section 42-619(9), Idaho Code and removes the independent financial audit requirement for most state water districts. The new law, referenced by Section 67-450B, Idaho Code (copy enclosed) identifies minimum audit requirements for all local government entities. Under the new statute, the governing body of any local government entity (i.e.; water district) whose annual budget does not exceed fifty thousand dollars (\$50,000) or less does not have to have an independent public account firm conduct a financial audit every few years as previously required by Section 42-619(9).

Please note that only the statutory requirement regarding the independent financial audit has been changed. Districts handling their own fund (i.e.; districts who collect and / or disburse their own funds) must still submit their own statement of the water district's financial affairs at the end of each fiscal year. As recommended in the Department's February 16, 1993 letter and the 1993 Watermaster Handbook, a copy of the financial statement may be submitted either with the annual water masters report or with the minutes of the annual meeting for the ensuing year. An example of an annual financial statement may be found in Appendix C of the 1993 Watermaster Handbook.

The purpose of this letter is to remind all water districts that workers compensation insurance is required for all water district employees. This requirement applies to all water districts in Idaho, regardless of annual budget. Insurance should be applicable at least to all paid water district staff, including the water master as well as watermaster assistants, advisory committee, secretary and treasurer. The costs associated with workers compensation insurance is paid directly by the water district and should be considered an expense of the district. For information about obtaining insurance costs etc., please contact the Idaho State Insurance Fund. The State Insurance Fund has offices in Boise, Coeur d'Alene, Idaho Falls, Pocatello and Twin Falls. Water Districts are also reminded that all paid water district staff may be subject to state and federal taxes. These tax requirements will vary depending on salaries and total income of each watermaster or employee. In many water districts, particularly smaller districts with part-time staff, payment of watermaster or each employee. Districts may wish to contact the State Tax Commission or the Internal Revenue Service for information about state and federal withholding taxes.

Sincerely,

Dennis M Dunn
Sr. Water Right Agent

WATER DISTRICT #11

Dear Secretary:

Enclosed herewith is a copy of the Watermaster's Annual Report for the past season.

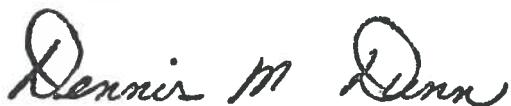

The same has been prepared by the watermaster and approved by this Department in conformity with Sections 42-610, 42-614 and 42-615, Idaho Code.

During the 1993 legislative session, the legislature enacted a new law which amends Section 42-619(9), Idaho Code and removes the independent financial audit requirement for most state water districts. The new law, referenced by Section 67-450B, Idaho Code (copy enclosed) identifies minimum audit requirements for all local government entities. Under the new statute, the governing body of any local government entity (i.e.; water district) whose annual budget does not exceed fifty thousand dollars (\$50,000) has no minimum audit requirements under this section. This means that any district which handles its own money and whose budget is fifty thousand dollars (\$50,000) or less does not have to have an independent public account firm conduct a financial audit every few years as previously required by Section 42-619(9).

Please note that only the statutory requirement regarding the independent financial audit has been changed. Districts handling their own fund (i.e.; districts who collect and/or disburse their own funds) must still submit their own statement of the water district's financial affairs at the end of each fiscal year. As recommended in the Department's February 16, 1993 letter and the 1993 Watermaster Handbook, a copy of the financial statement may be submitted either with the annual water masters report or with the minutes of the annual meeting for the ensuing year. An example of an annual financial statement may be found in Appendix C of the 1993 Watermaster Handbook.

The purpose of this letter is to remind all water districts that workers compensation insurance is required for all water district employees. This requirement applies to all water districts in Idaho, regardless of annual budget. Insurance should be applicable at least to all paid water district staff, including the watermaster as well as watermaster assistants, advisory committee, secretary and treasurer. The costs associated with workers compensation insurance is paid directly by the water district and should be considered an expense of the district. For information about obtaining insurance costs etc., please contact the Idaho State Insurance Fund. The State Insurance Fund has offices in Boise, Coeur d'Alene, Idaho Falls, Pocatello and Twin Falls. Water Districts are also reminded that all paid water district staff may be subject to state and federal taxes. These tax requirements will vary depending on salaries and total income of each watermaster or employee. In many water districts, particularly smaller districts with part-time staff, payment of watermaster or each employee. Districts may wish to contact the State Tax Commission or the Internal Revenue Service for information about state and federal withholding taxes.
