2018 Water Season

Lots of snow pack in the higher elevations made way for high water in the spring and early summer but unfortunately the water levels would not last due to little to zero percent of precipitation. There were some issues this year as far as ditch leakage as well as some users needing to fix their head gates and measuring devices and a few issues with water usage. I myself will take the time to talk to these water users before the start of the 2019 water season addressing usage and measuring devices. All measuring devices will need to be fixed or replaced before water will be turned on for the 2019 season. During the 2018 water season I took the time to walk pollard Cr. And found two different leaks which I addressed and fixed. I can't express enough that the water users should get involved in walking these creeks to check for leakage or blockage. I will be asking for a higher wage for the 2019 season. I feel to do a great job and to keep this water district on track I will be spending more time in the field and on the computer keeping better and more efficient records for all water users. I perform water measurements every Saturday this is not including all the days and evenings I go up to adjust water so the hours do add up. For the 2109 season I will be uploading measurements to the IDWR website every Saturday throughout the season, all users will be able to access the website and look at the water usage. In doing this I believe that I can distribute water in a better manner to all water users and myself and all water users can keep track of their water usage amounts so I can try to keep water flowing as long as possible. The 2019 water season

is not looking good as for snow in the higher elevations. Although no one can predict the weather as far as the precipitation we will receive this year. As the 2019 water season approaches, I recommend turning your water on as soon as you can. I look forward to serving as the 2019 water master for District 75A. If my term extends into 2019 water season I will be contacting water users before the start of the season to go over usage and measuring devices. Thankyou

A handwritten signature in black ink, appearing to be 'Cliff B...', with a long horizontal flourish extending to the right.

WATER DISTRICT #75A

Dear Watermaster:

Enclosed herewith is a copy of the Watermaster's Annual Report for the past season.

The same has been prepared by the watermaster and approved by this Department in conformity with Sections 42-610, 42-614 and 42-615, Idaho Code.

During the 1993 legislative session, the legislature enacted a new law which amends Section 42-619(9), Idaho Code and removes the independent financial audit requirement for most state water districts. The new law, referenced by Section 67-450B, Idaho Code (copy enclosed) identifies minimum audit requirements for all local government entities. Under the new statute, the governing body of any local government entity (i.e.; water district) whose annual budget does not exceed one hundred thousand dollars (\$100,000) has no minimum audit requirements under this section. This means that any district which handles its own money and whose budget is one hundred thousand dollars (\$100,000) or less does not have to have an independent public account firm conduct a financial audit every few years as previously required by Section 42-619(9).

Please note that only the statutory requirement regarding the independent financial audit has been changed. Districts handling their own fund (i.e.; districts who collect and / or disburse their own funds) must still submit their own statement of the water district's financial affairs at the end of each fiscal year. As recommended in the Department's February 16, 1993 letter and the 1993 Watermaster Handbook, a copy of the financial statement may be submitted either with the annual water masters report or with the minutes of the annual meeting for the ensuing year. An example of an annual financial statement may be found in Appendix C of the 1993 Watermaster Handbook.

The purpose of this letter is to remind all water districts that workers compensation insurance is required for all water district employees. This requirement applies to all water districts in Idaho, regardless of annual budget. Insurance should be applicable at least to all paid water district staff, including the water master as well as watermaster assistants, advisory committee, secretary and treasurer. The costs associated with workers compensation insurance is paid directly by the water district and should be considered an expense of the district. For information about obtaining insurance costs etc., please contact the Idaho State Insurance Fund. The State Insurance Fund has offices in Boise, Coeur d'Alene, Idaho Falls, Pocatello and Twin Falls. Water Districts are also reminded that all paid water district staff may be subject to state and federal taxes. These tax requirements will vary depending on salaries and total income of each watermaster or employee. In many water districts, particularly smaller districts with part-time staff, payment of watermaster or each employee. Districts may wish to contact the State Tax Commission or the Internal Revenue Service for information about state and federal withholding taxes.

Sincerely,

Sharla Cox
Administrative Assistant

RE: Water District No. #75A

Dear County Treasurer / Auditor:

Transmitted herewith is the 2018 Watermaster's Report and claim for services for the above mentioned Water District.

The various times in this report have been checked and have been found to be proper charges against the water users therein named. Section 42-612, 42-613 and 42-614 of the Idaho Code provides the procedure under which this claim shall be paid from the funds of the above named district.

If you have any questions, please contact us at once.

Sincerely,

Sharla Cox
