Att: Mr. Tim Luke,

Enclosed are sketches of water diversion locations and structures that are in place pertaining to Worm Creek and tributaries in Water District 13-A. Also are sketches of the lockable headgates and weirs that have been and will be put in place. The location of these diversions have not been changed.

Water District 13-A watermaster, Troy Foster, looked at the proposed sites and gave me some helpful ideas on headgate and weir locations. If these are to be put in for the 2011 irrigation season it would be helpful if we could receive approval before fall weather sets in.,

Thank you,

Glen C. Tanner
Tanner, Beckstead Ditch Co.

The headgate is proposed down the ditch from
the creek where the ditch bank is more stable.
I'm not a draftsman so these sketches
are not drawn to scale.
