Hagerman, Idaho 83332

Hagerman Water Users Association installed a new delivery system with an AWEP grant which took 3 years to complete. The system is now completed. A new measuring device for reporting and volume diversion needs to be installed because the old device is no longer accurate.

I met with Hagerman Water Users at their 2013 annual meeting and they agreed to install a meter in the pipeline where it crosses Billingsley Creek. The meter was to be installed prior to the start of the 2013 irrigation season. As of today it has not been installed.
