

**WATER DISTRIBUTION OF BOISE RIVER  
DISTRICT NO. 12-A  
1951**

REPORT ON  
CANAL DELIVERIES FROM  
BOISE RIVER  
AND

DIFFERENT FEATURES AFFECTING THESE  
DELIVERIES FOR THE IRRIGATION SEASON  
OF 1951  
1952

(DATA FOR THIS REPORT GATHERED BY THE  
WRITER WHILE ACTING IN THE CAPACITY  
OF WATERMASTER OF THE BOISE RIVER AND  
SPECIAL DEPUTY IN CHARGE OF THE DIS-  
TRIBUTION OF STORAGE WATER FROM ARROW-  
ROCK AND ANDERSON RANCH RESERVOIRS)

(COOPERATIVE DATA ALSO FURNISHED BY  
THE UNITED STATES BUREAU OF RECLAMATION  
AND THE UNITED STATES GEOLOGICAL SURVEY)

BY  
EDWIN B. KARN  
WATERMASTER, BOISE RIVER

## C H A R T S

1. Map of Boise River, showing canal diversions.
2. 2-A, 2-B, 2-C, 2-D, 2-E, 2-F, 2-G, 2-H, 2-I, 2-J and 2-K are tables showing natural flow of Boise River by days for the period from 1895 to 1940 inclusive. 2-L, 2-M, 2-N and 2-O show the same information for the period from 1941 to 1951 inclusive. *to date*
3. Table showing mean daily flow of Boise River for a 50 year period.
4. Table showing monthly and annual flow of Boise River in acre-feet, for the irrigation years from 1894-95 to 1950-51 inclusive. *to date*
5. 5-A, 5-B, 5-C, 5-D and 5-E, daily discharge of all canals (Sections 1 and 2) for irrigation season, ~~of 1951~~.
6. Summary table in acre-feet showing monthly and total canal diversions for the irrigation season, ~~of 1951~~.
7. 7-A, summary table showing total annual diversions for all Boise Valley canals beginning 1915.
8. 8-A and 8-B, daily discharge of all principal tributary streams feeding water to Boise River below More's Creek for irrigation season, ~~of 1951~~.
9. Two tables showing Boise River at Diversion Dam, canal deliveries, tributary gain, seepage gain and net gain, by months in acre-feet, and average daily flow in 24-hour second feet for the irrigation season, ~~of 1951~~.
10. Two tables for Section 1 of Boise River showing river at Diversion Dam, canal deliveries, tributary gain, seepage gain and net gain between Diversion Dam and Star, by months in acre-feet, and average daily flow in 24-hour second feet, for irrigation season, ~~of 1951~~.
11. Two tables for Section 2 of Boise River showing river at Star, canal deliveries, tributary gain, seepage gain and net gain between Star and Notus, by months in acre-feet, and average daily flow in 24-hour second feet, for irrigation season, ~~of 1951~~.
12. Table showing acreage under all canals in the Boise Valley.
14. Table showing acre-feet per acre diverted by Boise Valley canals for each irrigation season beginning 1934.

## C H A R T S

(Continued)

17. Table showing total discharge of drainage canals in Drainage District No. 2 for the irrigation season, of ~~1951~~.
18. Two tables showing total discharge of all drainage canals in Drainage Districts Nos. 3 and 4, for the irrigation season, of ~~1951~~.
19. Summary table of return flow to Boise River between the Government Diversion Dam and Notus beginning 1914.
20. Table showing distribution of drainage water to various canals
21. Table showing Intervenor Decress on Boise River (Intervenors in the Stewart Decree), giving priority number, date and amount decreed.
22. Table showing changes in point of diversion of decreed rights on Boise River.
23. 23-A, tables showing transfers of decreed rights on Boise River.
24. Condensed table of Stewart Decree showing dates of priority and amounts decreed.
25. 25-A, 25-B, 25-C, 25-D, 25-E, 25-F, 25-G, 25-H and 25-I are tables showing the Stewart, Invervenors' and Bryan Decrees grouped under canal headings.
26. 26-A, 26-B and 26-C are tables in second feet showing decreed rights (Stewart Decree) and natural flow at Diversion Dam necessary to fill same. 26-D is a table in second feet showing decreed rights (Bryan Decree) and natural flow in second feet necessary at Diversion Dam to fill same.

## ORGANIZATION

The Boise River Organization for 1952 was the same that it has been for several years past. It includes a Chairman and Secretary, a Watermaster, one Assistant for a few months during the summer, and a part-time stenographer.

The Advisory Committee, made up of nine members including the Chairman and Secretary of the Waterusers, was again elected at the annual meeting in March. In addition to the annual meeting held in the forenoon preceding the annual meeting of the Waterusers on the first Monday in March, at which time a tentative budget is prepared for submission to the general meeting, other meetings are held during the year at the call of the Chairman to consider various matters affecting the waterusers.

The Advisory Committee, elected at the annual meeting in March, was as follows:

T. M. DeCoursey, Chairman  
O. L. Greer, Secretary  
Ernest Anderson  
O. W. Bunton  
John Demond  
Wm. Wymer  
George M. Olsen  
Estel Putman  
W. W. Rhodenbaugh

Cooperative assistance is rendered by the Board of Control in current meter work, compiling records, maintaining phone to Arrowrock, etc., for which proper remuneration is given.

Cooperative assistance is also rendered by the U. S. Geological Survey in current meter work and compiling records of Boise River at Dowling and Notus, Middle Fork at Twin Springs and More's Creek at Call Bridge.

OK

The splendid assistance and cooperation rendered by the State Reclamation Engineer and the personnel of that office has been most helpful at all times, and appreciation is hereby expressed.

DECREES

**Stewart Decree:**

The old water rights from the Boise River are included in the decree in the case of FARMERS COOPERATIVE DITCH COMPANY, a Corporation, vs. RIVERSIDE IRRIGATION DISTRICT, LTD., a Corporation, et al, signed by District Judge George H. Stewart January 18, 1906, commonly referred to as the "Stewart Decree". This case was appealed to the Supreme Court and affirmed as to priorities and acreage, but remanded to the District Court for the sole and only purpose of determining the duty of water. In 1914 testimony was taken before the court as to the duty of water and was transcribed, which consists of approximately 2,630 typewritten pages. The final decree of the court as to the duty of water has never been entered. However, Judge Ed. L. Bryan, Judge of the District Court of the SEVENTH JUDICIAL DISTRICT of the State of Idaho, issued a continuing order on May 31, 1919, which is still in effect, providing for the distribution of the waters of Boise River in the following manner, to-wit:

"The various rights, as adjudicated in the so-called 'Stewart Decree', shall receive 100 percent, until the natural flow of the waters of Boise River shall decrease, until all the rights in said decree cannot receive 100 percent, at which time the various rights as adjudicated in the so-called 'Stewart Decree' shall first be cut to 75 percent of the amount of water decreed by the Stewart Decree as the natural flow of the Boise River decreases, beginning with the latest rights and proceeding to the

earliest rights in the order fixed in said Stewart Decree, and after all of the rights shall have been reduced to 75 percent of the amount fixed in the Stewart Decree, should the natural flow of the waters in Boise River decrease below the amount necessary to supply said 75 percent of the water rights as decreed in said Stewart Decree, then the various rights beginning with the latest and proceeding to the earliest, as aforesaid, shall be reduced to 60 percent of the amount specified in the Stewart Decree, and 60 percent of the amount decreed in the Stewart Decree is hereby fixed and determined as the highest duty of water for the year 1919."

Bryan Decree

In the SEVENTH JUDICIAL DISTRICT of the State of Idaho, Judge Ed. L. Bryan signed a decree on February 14, 1929, in the case of PIONEER IRRIGATION DISTRICT vs. AMERICAN DITCH ASSOCIATION, et al, commonly referred to as the "Flood Water Suit", or "Bryan Decree". All rights decreed in this case are made subsequent to the Stewart Decree. This case was appealed to the Supreme Court where it was upheld as to some of the rights involved but remanded to the District Court for retrial on the question of the duty of water and also for the purpose of determining certain other rights.

On January 30, 1932, Judge A. O. Sutton signed an order temporarily establishing the various rights in the Flood Water Suit and providing for a duty of water similar to the "Sliding Scale" in the Stewart Decree. On June 23, 1933, Judge Chas. E. Winstead of the THIRD JUDICIAL DISTRICT, sitting as Judge in the SEVENTH JUDICIAL DISTRICT for the State of Idaho, signed a continuing order making the order of Judge Sutton for 1932 effective for 1933 and continuing. This order has remained in effect since that time.

Charts 26, 26-A, 26-B and 26-C relate to the Stewart Decree and show

order of priority, name to whom decree was issued, amount of decree in second feet, showing 100 percent, 75 percent and 60 percent of natural flow necessary at Diversion Dam to fill various rights in the river in which point of diversion is located, date of decree, including intervenors, to 60 percent. In computing the amounts necessary to fill the decree, it is assumed that the return flow is 60 percent of the amount decreed. It is shown to sections 2 and 3 of the river would be affected by diversion in those sections of the river decreed.

Chart 26 shows the decree rights contained in the Stewart Decree. It shows the date of priority, name of person to whom decree was issued, amount of decree in second feet, 75 percent and 60 percent. It also shows the amount

of natural flow necessary at Diversion Dam to fill the various rights in the Flood Water Decree to 60 percent, 75 percent and 100 percent.

#### BOISE RIVER RUN-OFF AND AVAILABLE WATER SUPPLY

1957 2863930

The total annual flow for 1957 was 2,558,126 acre-feet. Precipitation was <sup>about</sup> above normal in March and <sup>above</sup> below normal in April. Irrigation started <sup>late</sup> early in April and built up fairly fast. <sup>see note</sup> The highest flow was 23,239 <sup>April 28</sup> 632 second feet on May 29 and the lowest flow was 474 second feet on September 26. River regulation was begun on July 1 and continued for the balance of the season. The demand for water was <sup>Fairly</sup> heavy until the <sup>last</sup> second week in September, and light for the balance of the season.

Charts 26, 26-A, 26-B and 26-C relate to the Stewart Decree and show the following information: Number of priority, name to whom decree was issued, amount of decree in second feet, showing 100 percent, 75 percent and 60 percent, and section of river in which point of diversion is located. It also shows the amount of natural flow necessary at Diversion Dam to fill the various rights in the Stewart Decree, including intervenors, to 60 percent, 75 percent and 100 percent. In computing the amounts necessary to fill the various rights in this table, it is assumed that the return flow will fill the first ~~22~~<sup>35</sup> rights to 60 percent of the amount decreed. It is also assumed that the return flow to sections 2 and 3 of the river would fill the rights with points of diversion in those sections of the river to 75 percent of the amount decreed.

Chart 26-D is a table showing the decreed rights contained in the Bryan Decree or Flood Water Decree. It shows the date of priority, name of wateruser to whom decree was issued, amount of decree in second feet, showing 100 percent, 75 percent and 60 percent. It also shows the amount of natural flow necessary at Diversion Dam to fill the various rights in the Flood Water Decree to 60 percent, 75 percent and 100 percent.

#### BOISE RIVER RUN-OFF AND AVAILABLE WATER SUPPLY

The total annual flow for 1951 was 2,558,126 acre-feet. Precipitation was about above normal in March and below normal in April. Irrigation started early in April and built up fairly fast. <sup>see note</sup> The highest flow was 23,239 second feet on April 28. The lowest flow was 474 second feet on September 26. River regulation was begun on July 1 and continued for the balance of the season. The demand for water was heavy until the last week in September, and light for the balance of the season.

Charts 2 to 2-K inclusive show the daily natural flow of the Boise River from 1895 to 1940 inclusive. Charts 2-L to 2-O inclusive show the daily natural flow of the Boise River from 1941 to <sup>date</sup> 1951 inclusive.

Chart 4 is a table compiled from previous charts, showing the total monthly and annual flow of the Boise River in acre-feet for the irrigation years beginning 1894-95.

#### CANAL REGULATIONS

It was necessary to begin canal regulations July 1.

Charts 5 to 5-E inclusive show the canal diversions for the period from April 1 to September 30.

Chart 6 shows the monthly and total diversions for the Boise River for the irrigation season of 1951.

Chart 7 is a table showing the return flow, canal diversions, winter diversions and winter waste for the entire Boise Valley for each season beginning 1916 to 1938 inclusive. Chart 7-A shows the same information from 1939 to date.

#### TRIBUTARY GAIN

Data were gathered and compiled on all principal tributary streams feeding water to Boise River below More's Creek.

Charts 8, 8-A and 8-B show the daily discharge of the tributary streams.

#### NET GAIN

Chart 9 shows the total flow of the Boise River passing Diversion Dam, canal deliveries, and gain to the river by months in acre-feet, and also average daily flow for each month during the season of 1951.

## RIVER FLUCTUATION

1952

Fluctuations of river flow were less than average in 1951. These fluctuations are largely beyond the control of the Watermaster and will continue to remain as a menacing problem from that standpoint in connection with irrigation deliveries.

### CLASSIFICATION OF RIVER

The Boise River naturally divides itself into three separate and distinct parts. Section I includes the part of the river which lies between the Government Diversion Dam and the Caldwell High Line Canal about a mile below the town of Star. Section II includes that section which lies between the Caldwell High Line Canal and the Notus Bridge. Section III includes that part of the river between the Notus Bridge and the Snake River.

#### SECTION I

Chart 10 shows the condition that existed in this section during the period July 1 to September 30 inclusive. The average net gain in this section per ~~month~~<sup>day</sup> during this period was ~~415~~<sup>345</sup> second feet.

#### SECTION II

Chart 11 is a table showing the condition that existed in this section during the period July 1 to September 30 inclusive. The average return flow per ~~month~~<sup>day</sup> during this period to this section was ~~931~~<sup>1034</sup> second feet.

#### SECTION III

The return flow to Section III was sufficient to take care of all rights in this section during the entire season, and therefore no regulations were required. In fact, during all of the years on record on the distribution of the waters of Boise River, beginning with 1914, there has been only one year--1931--during which it was necessary to regulate diversions from this section of the river, and during that year it was not necessary to run water past the Notus Bridge to supply the rights below.

The final determination of the duty of water, both in the "Stewart Decree" and the "Bryan Decree", is still pending in the District Court at Caldwell, Idaho. The writer's views are pretty well expressed in the following quotation from "REPORT ON CONSUMPTIVE USE--NET DUTY OF WATER--As Related to the Proper Adjudication of Water Rights on the Boise River", by W. G. Steward. Mr. Steward was formerly employed by the United States Reclamation Service in charge of Hydrographic work on the Boise River, and also for several years he was an instructor at the University of Idaho on the same subject. He had made a very comprehensive study of the duty of water, especially on the Boise River, and was well qualified on that subject. For these reasons the following quotations are submitted with the endorsement of the writer:

1. "That a duty of water, if established, should be subject to change when conditions warrant. Conditions are continually changing. Our knowledge and methods of irrigation are improving. An arbitrary duty that would meet all requirements today might prove entirely inadequate fifty years from now. Posterity should not be handicapped by our present day limitations.
2. "A duty, if established now, should be construed to mean a headgate duty, or duty at the point of diversion.
3. "The best information at hand today would indicate that a duty, if established, should conform very closely to the so-called 'sliding scale', as provided in the order issued by Judge Ed. L. Bryan on May 31, 1919. That if the present law does not permit the court to render a decision on the duty of water conforming closely with the above suggestions, the waterusers of the valley should arrange, by stipulation, for the delivery of water along the above suggested lines until such time as conditions have changed so as to warrant new distribution.

4. "That an exception to the 'sliding scale' should be made in the case of porous-gravel, river bottom lands, lying adjacent to and under the upper section of the river as per the Stewart Decree, to the extent that these lands should be allowed to divert such amount of water as their crops require and at such times as it is needed, said diversions not to exceed 1.10 miner's inches per acre. This, because no matter how much is diverted, all but a very small amount almost immediately returns to the river flow. To do this a system of rotation among themselves should be required.

5. "That said lands entitled to above exceptions should be determined before a decree is entered or stipulation is signed.

The court order providing for the "Sliding Scale cuts", under which the Boise River has been operated for about thirty years, has proven very satisfactory when the entire valley is taken into consideration. This court order is given in full on Page 2 of this report.

Chart 6 shows the amount in acre-feet diverted each month and the total amount diverted for the season by the canals in the Boise Valley.

Chart 14 is a table showing acre-feet per acre diverted by Boise Valley canals for each irrigation season beginning 1934. A similar record showing the acre-feet per acre diverted for 18 principal canals in the Boise Valley, beginning 1916, may be found in previous annual reports. The amount shown under the column "Acre Feet per Acre" cannot be construed as a duty of water for the lands of the Boise Valley, due to the large and varying quantities of return flow water picked up by many of these canals.

#### DRAINAGE

Chart 17 shows the total drainage discharge for Drainage District No. 2 for the season of 1950 and a summary for the same. This drainage district embraces an area of 29,000 acres situated on the north side of

Boise River between the City of Boise and the canyon near Caldwell.

Chart 18 is a table showing the discharge of all drains in both Drainage Districts Nos. 3 and 4. Drainage District No. 3, frequently referred to as the "South Boise Drainage District", is situated in South Boise. This district, comprising an area of 4,200 acres, has four drainage canals, all outlets emptying into the Boise River. Drainage District No. 4, frequently referred to as the "Thurman Drain", comprises an area of approximately 2,500 acres and is situated south of the Boise River and opposite the town of Eagle. This district has only one outlet to the Boise River.

Chart 19 is a table showing the average return flow to the Boise River for the period beginning 1914.

Chart 20 shows the method used in apportioning the drainage water to the various canals under the several court orders.

#### INTERVENORS

Chart 21 is a table showing the decrees obtained by intervenors in the case of Farmers Cooperative Ditch Company, Plaintiff, vs. Riverside Irrigation District, Ltd., et al, Defendants.

#### CHANGES IN POINT OF DIVERSION

Chart 22 is a table showing the change in the point of diversion of decreed rights on the Boise River as recorded in the office of the State Reclamation Engineer.

#### TRANSFERS

Charts 23 and 23-A are tables showing the transfer of decreed rights on the Boise River as recorded in the office of the State Reclamation Engineer.

### STEWART DECREE

Chart 24 is a condensed table of the Stewart Decree. A small circle at the left of the date of priority shows that the right is supplied by "return flow".

Charts 26, 26-A, 26-B and 26-C are tables showing decreed rights contained in the Stewart Decree and the natural flow at the Diversion Dam necessary to fill the same.

### STEWART AND BRYAN DECREES GROUPED BY CANAL HEADINGS

These tables, Charts 25-A to 25-I inclusive, have been compiled for the benefit of those canal companies which have more than one date of priority. These tables also include the transfers and changes in point of diversion. They show the date and amount of each priority and the total amount decreed.

### BRYAN DECREE

Chart 26-D is a table showing decreed rights contained in the Bryan Decree and the natural flow necessary at the Diversion Dam to fill the same.

### WATERSHED

The following is quoted from the 1947 report:

"The question of watershed protection will always be of paramount importance to the waterusers of Boise Valley. It is regrettable, however, that on matters of this kind the people of the valley generally are too much inclined to take the attitude of 'Let George do it'. The preservation and protection of this great natural resource, not only for the benefit of present day waterusers but for generations yet to come, should have the constant attention and consideration of all concerned. It is the opinion of this writer that this resource, which is of such importance

to the entire populace of the Boise Valley, should remain under federal control."

STORAGE WATER

Both Anderson Ranch and Arrowrock Reservoirs have been lowered considerably in anticipation of a heavy runoff. They will both be filled to capacity and storage water will be ample. Two generators are now in operation.

FLOOD CONTROL

*October*  
Lucky Peak Dam construction has been delayed, and is progressing rapidly, but it will be 1954 before any water can be stored, according to present calculations.

The Army Engineers have had no money appropriated for work on Boise River. There are several very bad places along the river and some damage is anticipated.

As of March 1 there was 225,000 acre ft in Anderson Ranch Reservoir and 277,000 in Arrowrock Reservoir. No water is being released from Anderson Ranch. Arrowrock will be lowered some in anticipation of the runoff which is not expected to be heavy.

1952  
COST REPORT - 1951

Watermaster Salary . . . . .	\$4,800.00	5000.00
Assistant Watermaster Salary . . . . .	991.67	250.00
Car Mileage . . . . .	851.91	1008.77
Miscellaneous . . . . .	405.66	699.98
Telephone . . . . .	46.77	78.78
<i>Office Rent</i> Gage Readings . . . . .	20.00	<del>1000</del> 180.00
Stenographic Services . . . . .	322.20	313.00
Insurance . . . . .	67.60	82.20
Social Security Tax . . . . .	54.00	48.50
Sub-Total . . . . .		<u>\$7,559.81</u>

SERVICES RENDERED BY THE  
BOISE PROJECT BOARD OF CONTROL

Gage Readers, Dowling . . . . .	\$ 180.00
More's Creek . . . . .	160.00
Telephone Service to Upper River . . . . .	270.00
Assistance in Current Meter Work . . . . .	235.00
Office Work, compiling records of natural flow, etc. . . . .	225.00
Total value of services as fixed by Committee . . . . .	1,070.00
TOTAL COSTS TO WATER DISTRICT 12-A FOR THE YEAR 1950 . . . . .	<u>\$9,331.23</u>
<i>1952</i>	<u>\$8,629.81</u>

## CONCLUSIONS

1. That the records and data substantially as compiled in the Watermaster's report for the past thirty years should be continued.
2. That the river naturally divides itself into three sections during the low water period.
3. That the river can be completely dried up at the lower end of Section I without injury to the rights in Section II during the low water period of each irrigation year.
4. That the return flow is a vital factor and must be considered in the operation of the river.
5. That the transfer of water rights from Section II to Section I is injurious to the rights already existing in Section I and should not be permitted.
6. That the construction of drainage systems in the Boise Valley has changed the irrigation requirements within these districts.
7. That by reason of the construction of these drainage canals certain waters which were formerly lost through seepage, evaporation and deep percolation, or reached the river during the winter months, are probably now reaching the river during the irrigation season and made available for irrigation purposes.
8. That the question of protection of the Boise River watershed should have the constant attention and consideration of the people of this area.
9. That a reasonable program of research work should be continued by the U. S. Forest Service on the Boise River watershed for the purpose of determining to what extent the resources of the watershed may be

utilized without being injurious to the inherent rights of the waterusers who are dependent upon this resource for a livelihood.

10. That the knowledge and data upon which a permanent duty of water must necessarily be based are constantly being improved and increased.

11. That an arbitrary duty of water, if established, should be subject to change from time to time.

12. That the "Court Orders" under which the Boise River has been operated for approximately 30 years have proven very satisfactory to the Boise Valley as a whole.

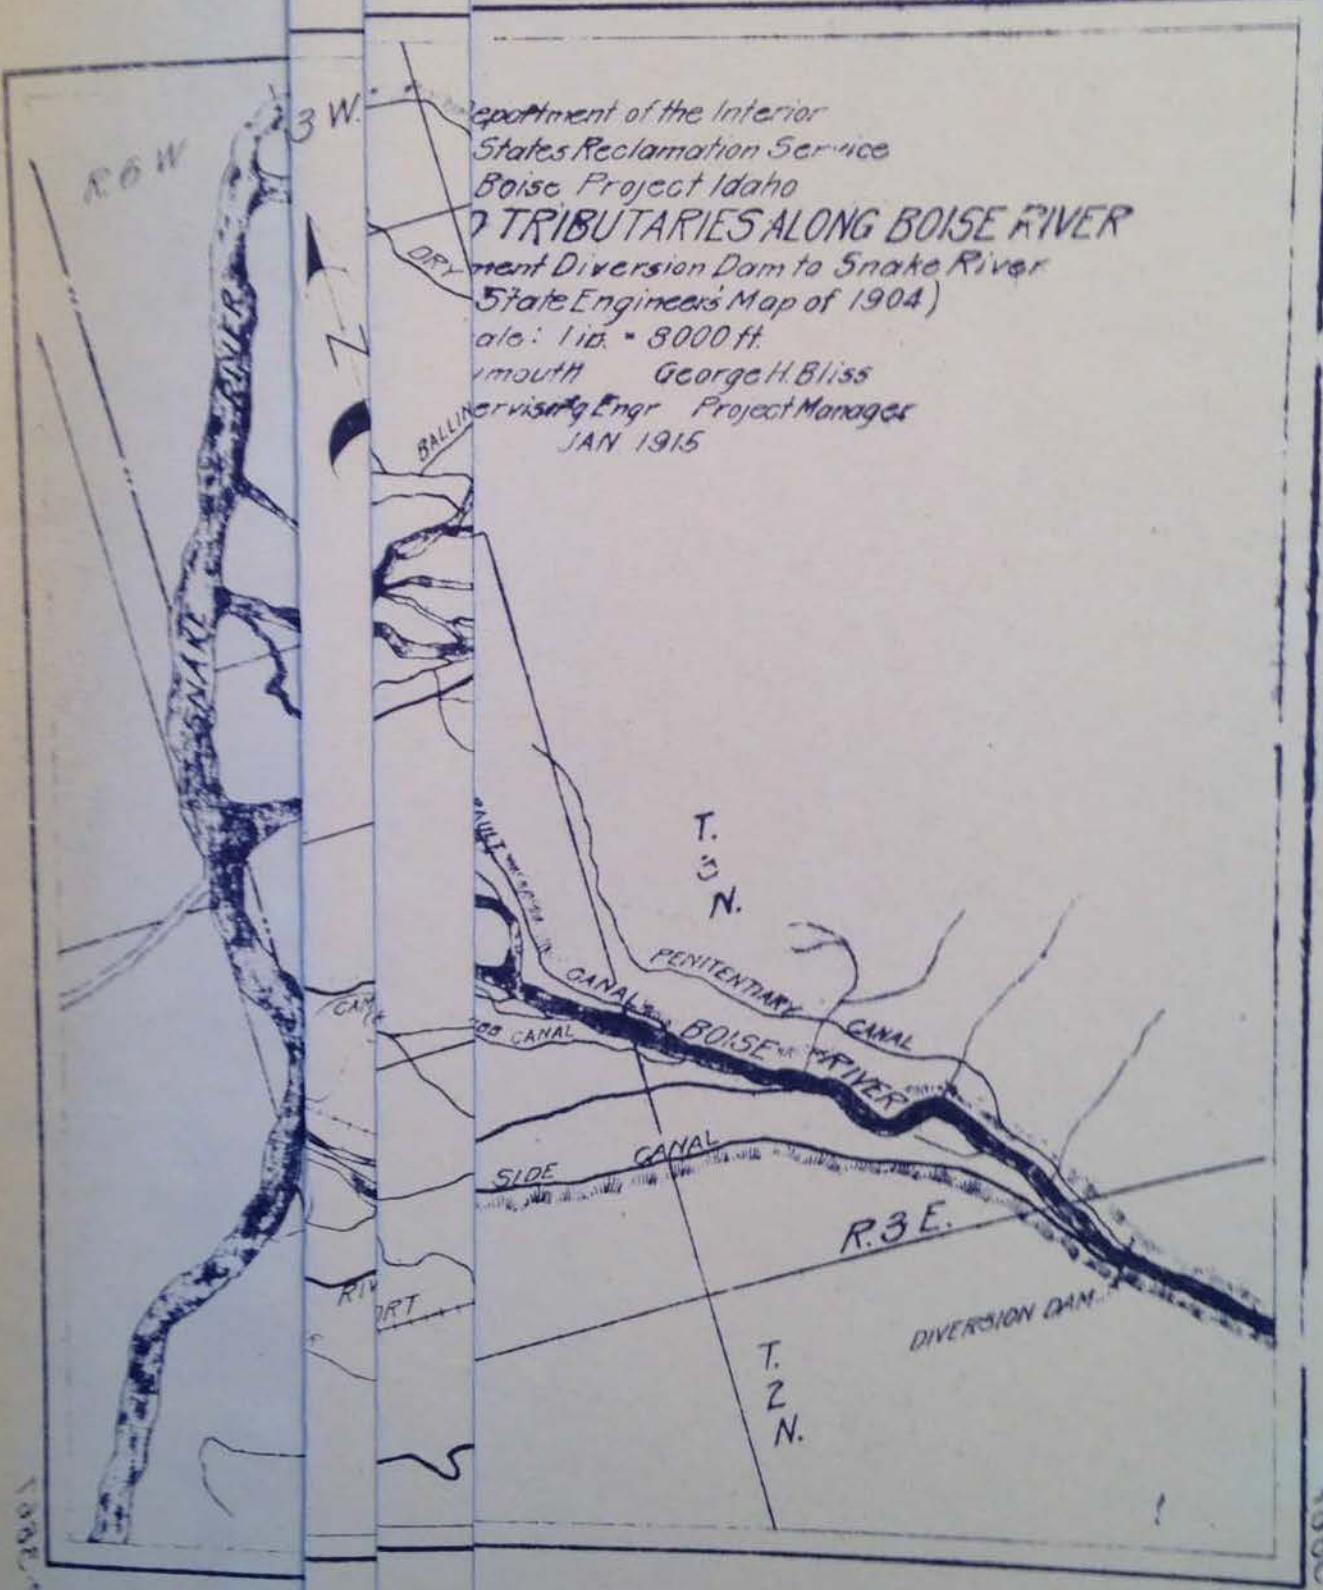

13. That if the so-called "sliding scale" should be fixed by the Court as a permanent duty of water for the Boise Valley, then an exception to said "sliding scale" should be made in the case of certain river bottom lands.

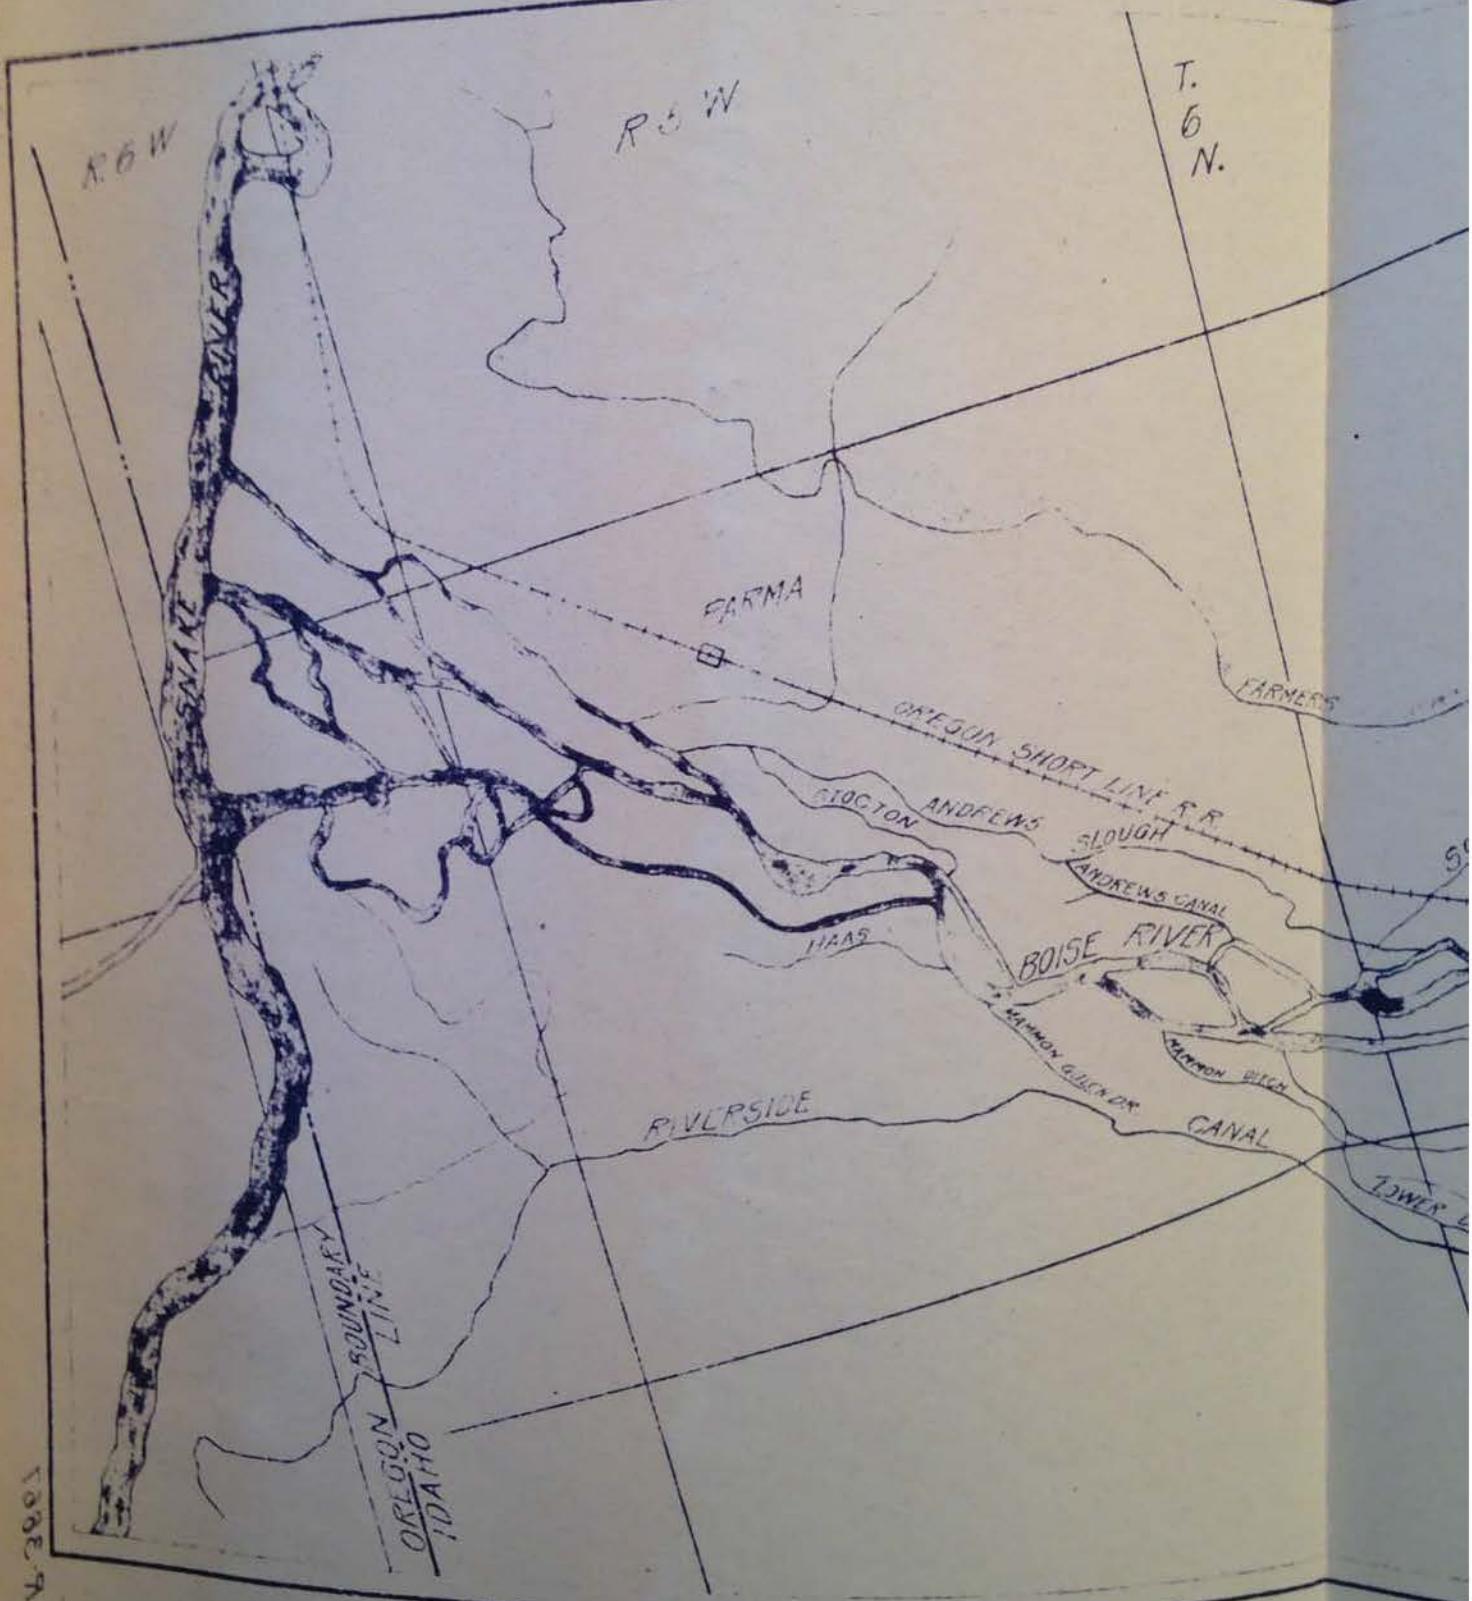

14. That mining operations within the bed of the Boise River and its tributaries should not be permitted.

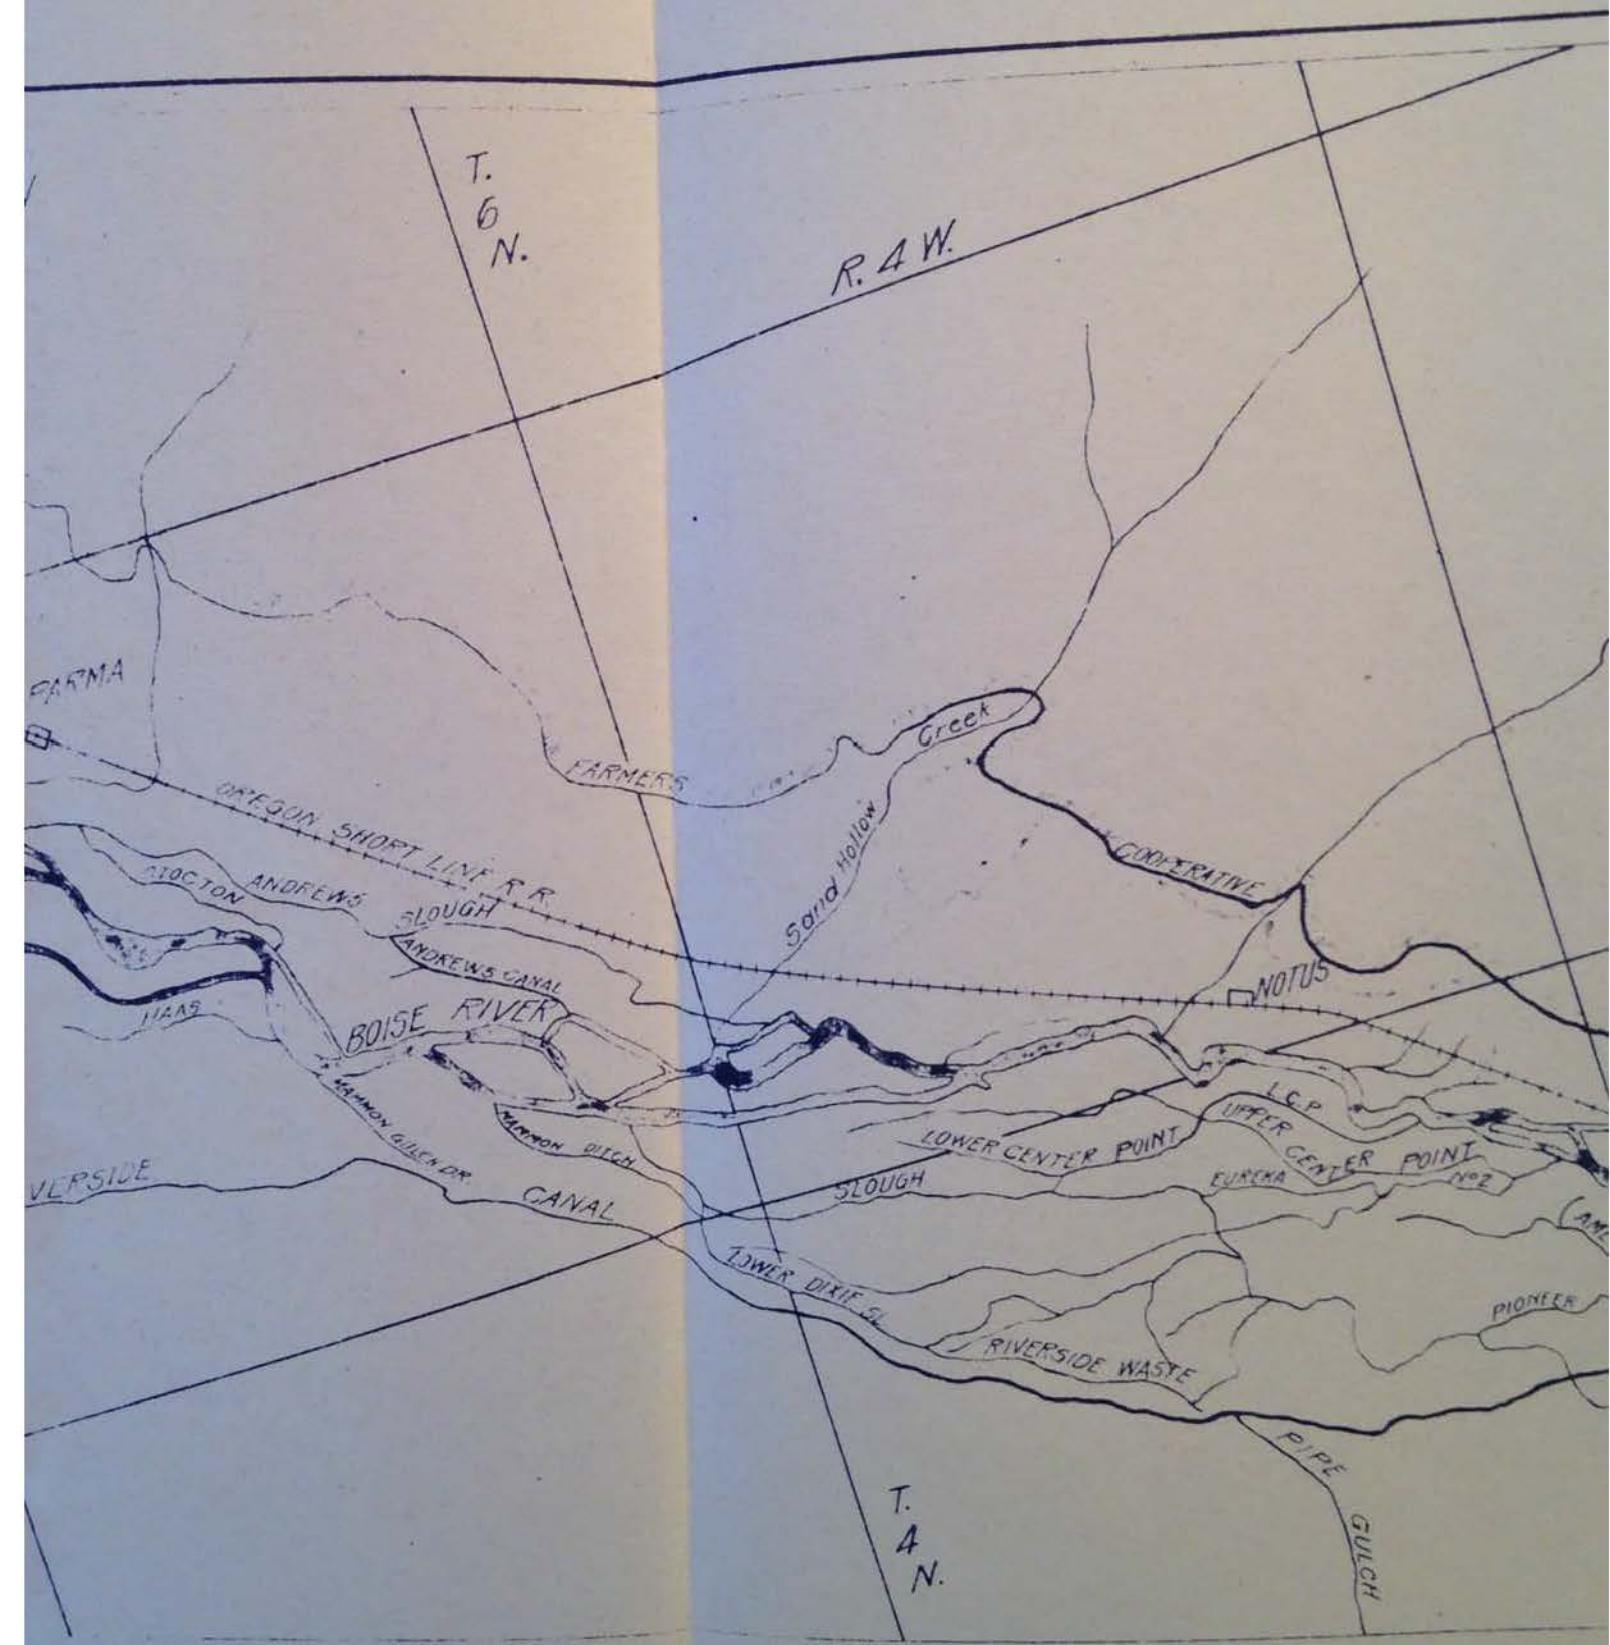

15. That the constant threat of flood is a serious menace to the low lands of the Boise Valley.

16. That Lucky Peak Dam and Reservoir, as authorized by the Congress, will go a long way towards solving the flood problems of the Boise Valley.

Caldwell Irrigation District . . . .	850 "
Moreland & Vail (Dixie Drain) . . .	<u>640</u> "
GRAND TOTAL . . . . .	<u>7,990</u> <u>334,180</u>

This acreage is based, in some instances, upon actual surveys, and in other cases upon the acreage as determined at the time of the Stewart Decree, and is the best information available at the present time. It was originally computed February 14, 1941, but has been again revised (July, 1948), particularly to reduce river bottom acreages to conform to Stewart Decree acreages as determined by special committee. See explanation in Watermaster's Report for 1947.

Ridenbaugh represents old lands within the Nampa & Meridian Irrigation District that are watered by the old Ridenbaugh water rights in the Stewart Decree. The balance of the Nampa & Meridian Irrigation District lands are included under the Board of Control. (Some of the acreages were revised April 10, 1944.)

## Chart No. 20

DISTRIBUTION OF DRAINAGE WATER  
TO VARIOUS CANALS  
1950

## Drainage District No. 2

	Percent of Total		Percent of Total
Farmers Union	20.99	Canyon County	12.68
Boise Valley	10.03	Ballantine	3.04
New Dry Creek	9.47	Boise City	3.01
New Union	1.21	Consumers	.11
Middleton Canal	35.00	Little Pioneer	4.46

The credits given above are based on a drainage flow of 100 second feet while canal deliveries are 100 percent.

Judge Brink order, August, 1928, gives 90 inches additional to Farmers Union.

## Drainage District No. 3

	Percent of Total		Percent of Total
Board of Control	49	Rossi Mill	10
Ridenbaugh	24	Meeves	2
Bubb (South Boise)	15		

The credits given are based upon a drainage discharge of 15 second feet while canal deliveries are 100 percent.

## Drainage District No. 4

## Inches

Thurman Mill	570.98
Ridenbaugh	51.34
Warm Springs Slough	127.68

The credits above are based on a drainage discharge of 750 inches, and the amounts are a direct court order.
