

WATER DISTRIBUTION OF BOISE RIVER
DISTRICT NO. 12-A
1942

REPORT ON

- CANAL DELIVERIES FROM
BOISE RIVER

2-4, 2-5, and 2-6 are
values showing natural flow of Boise River by days for 10-year
period. 2-7 are taken of natural flow of Boise River
by days for two years 1941 and 1942.

AND

DIFFERENT FEATURES AFFECTING THESE
DELIVERIES FOR THE IRRIGATION SEASON
OF 1942

Table showing monthly and annual flows of Boise River in acre feet
for the irrigation years beginning 1940-1949.

(DATA FOR THIS REPORT GATHERED BY THE
WRITER WHILE ACTING IN THE CAPACITY
OF WATERMASTER OF THE BOISE RIVER AND
SPECIAL DEPUTY IN CHARGE OF THE DIS-
TRIBUTION OF STORAGE WATER FROM ARROW-
ROCK RESERVOIR)

(COOPERATIVE DATA ALSO FURNISHED BY THE
UNITED STATES BUREAU OF RECLAMATION AND
THE UNITED STATES GEOLOGICAL SURVEY)

Table showing Boise River at Diversion Dam, canal deliveries,
tributary gage, storage gain and net gain by months in acre feet
and average daily flow in 24 hour second feet for the irrigation
season of 1942.

Table showing Boise River at Diversion Dam, canal deliveries,
tributary gage, storage gain, and net gain
between Diversion Dam and Pier by months in acre feet and average
daily flow in 24 hour second feet for irrigation season of 1942.

Table showing Boise River at Pier, canal deliveries,
tributary gage, storage gain, and net gain
between Pier and Nampa by months in acre feet and average
daily flow in 24 hours per second feet for irrigation season of 1942.

WM. E. WELSH

WATERMASTER, BOISE RIVER

CHARTS

1942

1. Tables for Boise Valley canals showing acre feet diverted.
1. Map of Boise River, showing canal diversions.
2. 2-A, 2-B, 2-C, 2-D, 2-E, 2-F, 2-G, 2-H, 2-I, 2-J, and 2-K are tables showing natural flow of Boise River by days for 46-year period. 2-L, 2-M are tables showing natural flow of Boise River by days for two years—1941 and 1942.
3. Table showing mean daily flow of Boise River for a 42-year period.
4. Table showing monthly and annual flow of Boise River in acre feet for the irrigation years beginning 1894-1895.
5. 5-A, 5-B, 5-C, 5-D, and 5-E, daily discharge of all canals (Sections 1 and 2) for irrigation season of 1942.
6. Summary table in acre feet showing monthly and total canal diversions for the irrigation season of 1942.
7. Summary table showing total annual diversions for all Boise Valley canals beginning 1916.
8. 8-A and 8-B, daily discharge of all principal tributary streams feeding water to Boise River below More's Creek for irrigation season of 1942.
9. Two tables showing Boise River at Diversion Dam, canal deliveries, tributary gain, seepage gain and net gain by months in acre feet and average daily flow in 24 hour second feet for the irrigation season of 1942.
10. Two tables for section 1 of Boise River showing river at Diversion Dam, canal deliveries, tributary gain, seepage gain, and net gain between Diversion Dam and Star by months in acre feet and average daily flow in 24 hours second feet for irrigation season of 1942.
11. Two tables for section 2 of Boise River showing river at Star, canal deliveries, tributary gain, seepage gain, and net gain between Star and Notus by months in acre feet and average daily flow in 24 hours second feet for irrigation season of 1942.
12. Table showing acreage under all canals in the Boise Valley.

13. Two tables in acre feet showing diversions between Notus and Idaho River, and natural flow at Payette River between Notus and Idaho River. 26-day tables in acre feet showing diversions between Payette River and natural flow to point of confluence at Diversion to Willamette.

CHARTS

(Continued)

13. Table for Boise Valley canals showing acre feet diverted, acres irrigated and acre feet per acre diverted for the irrigation season of 1942.
14. Table showing acre feet per acre diverted by 18 canals from Boise River for each irrigation season beginning in 1916.
15. Summary table showing diversions from Boise River in acre feet, acre feet per acre, and the rate in miner's inches per acre for 18 Boise Valley canals for each month of the irrigation season during the years 1916 to 1942 inclusive; also, the per cent diverted during each month.
16. Chart showing average headgate duty of water for 18 Boise Valley canals.
17. Table showing total canal diversions and total discharge of drainage canals in Drainage District No. 2 for the irrigation season of 1942.
18. Summary table of return flow to Boise River between the Government Diversion Dam and Notus beginning 1914.
19. Two tables showing total discharge of all drainage canals in Drainage Districts No. 3 and 4, for the irrigation season of 1942.
20. 20-A, 20-B, revised area and capacity table for Arrowrock Reservoir.
21. Table showing additional decrees on Boise River (Inter-venors in the Stewart Decree), giving priority number, date and amount decreed.
22. Table showing change in point of diversion of decreed rights on Boise River.
23. Table showing transfer of decreed rights on Boise River.
24. Condensed table of Stewart Decree showing dates of priority and amounts decreed.
25. 25-A, 25-B, 25-C, and 25-D are tables of the Stewart Decree grouped under canal headings.
26. 26-A, 26-B, 26-C, tables in second feet showing decreed rights (Stewart Decree) and natural flow at Diversion Dam necessary to fill same. 26-D, table in second feet showing decreed rights (Bryan Decree) and natural flow in second feet necessary at Diversion to fill same.

ORGANIZATION

The Boise River Organization consists of a Chairman and Secretary, an Advisory Committee of 9 members, a Watermaster and one part time Secretary and Stenographer; also one Assistant Watermaster who is employed during the irrigation season on the lower end of the Boise River.

The Advisory Committee, although not authorized by law, is elected by the water-users at the annual meeting on the first Monday in March. This Advisory Committee is selected from the various sections of the Boise Valley. In addition to preparing and recommending a budget for the annual meeting, it meets from time to time to consider various questions affecting the water-users and the water rights from the Boise River. It also considers and assists in determining questions of policy having to do with the operation of Water District 12-A.

This committee for 1942 was as follows:

J. M. Lampert	Chairman
Ed Straus	Secretary
Ernest Anderson	
J. C. Bell	
T. M. DeCoursey	
John Demond	
W. T. Evans	
H. V. Rice	
I. A. Weaver	

Cooperative assistance is rendered by the Board of Control in current meter work, compiling records, maintaining phone to Arrowrock, etc., for which proper remuneration is given.

Cooperative assistance is rendered by the U. S. Geological Survey in current meter work and compiling records of Boise River at Dowling and Notus, South Fork near Smith's Prairie, Middle Fork at Twin Springs and More's Creek at Call Bridge.

Mention should also be made of the splendid assistance and cooperation rendered by the Commissioner of Reclamation in furnishing office room and equipment and the many courtesies extended during the year by the personnel of this office.

DECREE

The old water rights from the Boise River are included in the decree in the case of FARMERS COOPERATIVE DITCH COMPANY, a Corporation, vs. RIVERSIDE IRRIGATION DISTRICT LTD., a corporation, et al., signed by District Judge George H. Stewart January 18, 1906, commonly referred to as the "Stewart Decree". This case was appealed to the Supreme Court and affirmed as to priority and acreage, but remanded to the District Court for the sole and only purpose of determining the duty of water, where it is still pending. A temporary order providing for the distribution of the waters of Boise River was issued by the District Court from year to year. In 1919 this order was made continuing and is still in effect. It provided for the distribution of the waters from Boise River in the following manner, to-wit: "The various rights, as adjudicated in the so-called 'Stewart Decree' shall receive 100 per cent, until the natural flow of the waters of Boise River shall decrease, until all the rights in said decree cannot receive 100 per cent, at which time the various rights as adjudicated in the so-called 'Stewart Decree' shall first be cut to 75 per cent of the amount of water decreed by the Stewart Decree as the natural flow of the Boise River decreases, beginning with the latest rights and proceeding to the earliest rights in the order fixed in said 'Stewart Decree', and after all of the rights shall have been reduced to 75 per cent of the amount fixed in the Stewart Decree, should the natural flow of the waters in Boise

River decreases below the amount necessary to supply said 75 per cent of the water rights as decreed in said 'Stewart Decree', then the various rights beginning with the latest and proceeding to the earliest, as aforesaid, shall be reduced to 60 per cent of the amount specified in the Stewart Decree and 60 per cent of the amount decreed in the Stewart Decree is hereby fixed and determined as the highest duty of water for the year 1919."

In the SEVENTH JUDICIAL DISTRICT of the State of Idaho, JUDGE ED. L. BRYAN, signed a decree on February 14, 1929, in the case of PIONEER IRRIGATION DISTRICT VS. AMERICAN DITCH ASSOCIATION, ET AL, commonly referred to as the "FLOOD WATER SUIT", or "BRYAN DECREE." All rights decreed in this case are made subsequent to the Stewart Decree. This case was appealed to the Supreme Court where it was upheld as to some of the rights involved but remanded to the District Court for retrial on the question of the duty of water, also for the purpose of determining certain other rights.

On January 30, 1932, JUDGE O. E. SUTTON signed an order temporarily establishing the various rights in the Flood Water Suit and providing for a duty of water similar to the "sliding scale" in the Stewart Decree. This order has remained in effect since that time.

Charts 26, 26-A, 26-B, 26-C, relate to the Stewart Decree and show the following information: Number of priority, name to whom decree was issued, amount of decree in second feet showing 100 per cent, 75 per cent, and 60 per cent, and section of River in which point of diversion is located. It also shows the amount of natural flow necessary at Diversion Dam to fill the various rights in the Stewart Decree, including intervenors, to 60 per cent, 75

per cent and 100 per cent. In computing the amounts necessary to fill the various rights in this table it is assumed that the return flow will fill the first 32 rights to 60 per cent of the amount decreed. It is also assumed that the return flow to Section 2 and 3 of the River would fill the rights with points of diversion in those sections of the River to 75 per cent of the amount decreed.

Charts 26-D is a table showing the decreed rights contained in the Bryan Decree or Flood Water Decree. It shows the date of priority, name of water users to whom decree was issued, amount of decree in second feet showing 100 per cent, 75 per cent and 60 per cent. It also shows the amount of natural flow necessary at Diversion Dam to fill the various rights in the Flood Water Decree to 60 per cent, 75 per cent and 100 per cent.

BOISE RIVER RUNOFF

The total runoff for the irrigation year beginning October 1, 1941 was 1,680,172 acre feet, a little more than 80 per cent of the average runoff. However, the flow held up fairly well. It was not necessary to draw on Arrowrock Reservoir and consequently to commence cutting rights in the Bryan Decree until July 4th. Cuts were not made in the Stewart Decree until July 16th. There was some shortage during September. The New York Canal was out of water for about a week. The Phyllis Canal, however, was dry for a total of about 23 days during this month.

The same method that was employed for the past several seasons of arriving at the daily natural flow of the Boise River was used during the season of 1942.

Charts 2 to 2-K inclusive show the daily natural flow of the Boise River from 1895 to 1940 inclusive. Charts 2-L and 2-M show the daily natural flow of the Boise River for the years 1940 and 1941.

Chart 3 is a table showing the mean daily flow of the Boise River for a 42 year period.

Chart 4 is a table compiled from previous charts, showing the total monthly and annual flow of the Boise River in acre feet for the irrigation years beginning 1894 - 1895.

CANAL REGULATIONS

Canals were regulated during the early Spring months and particularly the flow of the River at Notus was watched to see that no water was wasted until it became evident that Arrowrock would be filled.

Charts 5 to 5-E inclusive show the canal diversions for the period from April 1 to September 30.

Chart 6 shows the monthly and total diversions for the Boise River for the irrigation season of 1942.

Chart 7 is a table showing the return flow, canal diversions, Winter diversions and Winter waste for the entire Boise Valley for each season beginning 1916.

TRIBUTARY GAIN

Data were gathered and compiled on all principal tributary streams feeding water to Boise River below More's Creek.

Charts 8-A and 8-B show the daily discharge of the tributary streams.

NET GAIN

Chart 9 shows the total flow of the Boise River passing Diversion Dam, canal deliveries, and gain to the River by months in acre feet, and also average daily flow for each month during the season of 1942.

RIVER FLUCTUATION

Fluctuations caused by so many factors beyond the control of the Watermaster always have been and always will be a menacing problem from the standpoint of maintaining a steady flow of water at the lower end of the Boise River.

CLASSIFICATION OF RIVER

The Boise River naturally divides itself into three separate and distinct parts. Section I includes the part of the River which lies between the Government Diversion Dam and the Caldwell High Line Canal about a mile below the town of Star. Section II includes that section which lies between the Caldwell High Line Canal and the Notus Bridge. Section III includes that part of the River between the Notus Bridge and the Snake River.

SECTION I

Chart 10 shows the condition that existed in this section during the period July 1 to September 30, inclusive. The average gain to this section during the period was 1 second feet.

SECTION II

Chart 11 is a table showing the condition that existed in this section during the period July 1 to September 30, inclusive.

There are 8 canals diverting water from this section, with an aggregate decreed right of 540 second feet. Usually it is necessary to run "live water", or natural flow, past the headgate of the Caldwell High Line Canal and into this section of the River during the Spring months and until the rights in the Stewart Decree are cut to 75 per cent. After that time the River is dried completely at the headgate of the Caldwell High Line Canal and these 8 canals diverting from Section II of the River are supplied entirely from return flow.

The average return flow to this section during the period was second feet.

SECTION III

The return flow to Section III was sufficient to take care of all rights in this section during the entire season and therefore no regulations were required in this section. In fact, during all of the time in which records have been kept of the distribution of the waters of the Boise River beginning in 1914 there has been only one year, 1931, during which it was necessary to regulate diversions from this section of the River.

DUTY OF WATER

The following statement, a repetition from previous reports, is again included in this report.

"The determination of the duty of water in both the 'Stewart Decree' and the 'Bryan Decree' is still pending in the District Court at Caldwell, Idaho.

"In the opinion of the writer it is doubtful if a fixed and established duty of water will ever prove satisfactory for the Boise Valley. A duty of water that would take care of crop requirements for one season would be inadequate for another. Seasonal conditions are continually changing. Likewise, conditions over the valley are changing. Our knowledge and methods of irrigation are constantly improving with each year of experience.

"An arbitrary duty should not be established without taking into consideration the inherent rights of all those persons who are dependent upon this great natural resource for their subsistence.

"An arbitrary duty, if established, should be subject to

change from time to time. What that duty should be, I am not prepared to say."

The temporary court order providing for the "Sliding scale cuts", under which the Boise River has been operated for more than twenty years, has proved very satisfactory when the entire valley is taken into consideration. The temporary court order is given in full on page 2 of this report.

Chart 6 shows the amount in acre feet diverted each month and the total amount diverted each season for the canals of the Boise Valley.

Chart 13 is a table showing the total amount diverted, the acres irrigated and the acre feet per acre diverted from the River by the various canals of the Boise Valley. The amount shown under the column "Acre Feet Per Acre" cannot be construed as a duty of water for the lands of the Boise Valley, due to the large and varying quantities of return flow water picked up by many of these canals.

Chart 14 is a summary table for the years beginning 1916 for 18 Boise Valley Canals showing the acre feet per acre diverted.

Chart 15 is a table for 18 Boise Valley Canals beginning 1916 showing the total acre feet diverted, acre feet per acre, rate in miner's inches per acre, and per cent per month.

Chart 16 shows the average headgate duty of water for 18 Boise Valley Canals.

DRAINAGE

Chart 17 shows the total canal diversions and the total drainage discharge for Drainage District No. 2 for the season of 1942. Drainage District No. 3, frequently referred to as the South Boise Drainage District, is situated in South Boise. This

district has four drains or outlets emptying into Boise River and comprises an area of approximately 4,200 acres.

Drainage District No. 4, frequently referred to as the Thurman Drain, comprising an area of approximately 2,500 acres, is situated south of the Boise River and opposite the town of Eagle. This district has only one outlet to the River.

Chart 19 is a table showing the discharge of all drains in Drainage Districts No. 3 and 4.

Chart 18 is a table showing the average return flow to the Boise River for the period beginning 1914.

ARROWROCK CAPACITY

Charts No. 20, 20-A and 20-B show the W. G. Stewart capacity table for Arrowrock Reservoir as revised by W. H. Tuller, Project Manager, Boise Project.

ADDITIONAL DECREES

Chart No. 21 is a table showing the additional decrees obtained by intervenors in the case of Farmers Cooperative Ditch Company, plaintiff, vs. Riverside Irrigation District, Ltd., et al, defendants, which is commonly referred to as the "Stewart Decree."

CHANGE IN POINT OF DIVERSION

Chart No. 22 is a table showing the change in the point of diversion of the decreed rights on the Boise River as recorded in the office of the State Reclamation Engineer.

TRANSFERS

Chart No. 23 is a table showing the transfers of decreed rights on the Boise River as recorded in the office of the State Reclamation Engineer.

STEWART DECREE

Chart No. 24 is a condensed table of the Stewart Decree. A small circle at the left of the date of priority shows that the right is supplied by "return flow".

Charts No. 26, 26-A, 26-B, and 26-C are tables showing decreed rights as contained in the Stewart Decree and the natural flow at the Diversion Dam necessary to fill the same.

STEWART AND BRYAN DECREE GROUPED BY CANAL HEADINGS

These tables, Charts No. 25-A, 25-B, 25-C and 25-D, have been compiled for the benefit of those canal companies who have more than one date of priority. These tables show the date and amount of each priority and the total amount decreed.

BRYAN DECREE

Chart No. 26-D is a table showing decreed rights contained in the Bryan Decree and the natural flow necessary at the Diversion Dam to fill the same.

WATERSHED

The question of watershed protection continues to be a matter of serious concern to the Water-Users of the Boise Valley.

The Water-Users should continue to cooperate with the Forest Service. The Forest and Range Experimental Station near Idaho City will probably have some valuable information. A reasonable program of experimentation and investigation should be continued.

The rights and interests of the Water-Users of the Boise River should be continuously guarded and protected.

SUPPLEMENTAL WATER

The Water-Users of the Boise Valley have been working with the U. S. Bureau of Reclamation and other Federal agencies for a good many years attempting to solve the problem of supplemental

water. After the Corps of Army Engineers determined that there was justification for flood control, Anderson Ranch Reservoir was decided upon; contracts were let; and construction started late in the Fall of 1941. It is anticipated that the completion of this reservoir will practically eliminate water shortage in the Boise Valley. The construction of Anderson Ranch Dam has been temporarily halted because of the war but consideration is now being given to the possibility of renewing construction because of the increased demand for food production.

MINING OPERATIONS

The Boise River Advisory Committee has consistently opposed either placer mining or dredging in the bed of the Boise River or its tributaries. This committee is of the opinion that such mining operations will result in considerable silt and sediment being washed down the River into the Arrowrock Reservoir and later into the irrigation canals where it will do great damage.

COST REPORT - 1942

Watermaster Salary.....	\$ 3500.00
Assistant Watermaster Salary.....	478.00
Car Mileage.....	1086.68
Miscellaneous.....	391.50
Telephone.....	83.56
Gage Readings.....	90.00
Stenographic Services.....	598.70
Insurance.....	<u>78.22</u>
Sub-total	\$ 6306.66

SERVICES RENDERED BY THE U. S.
BUREAU OF RECLAMATION AND THE
BOARD OF CONTROL, BOISE RIVER

Gage Readers, Dowling.....	\$ 180.00
More's Creek.....	120.00
Telephone service to upper River.....	270.00
Assistance in Current Meter Work.....	235.00
Office work, compiling records of natural flow, etc.....	<u>225.00</u>
Total value of services as fixed by Committee.....	\$ 1030.00
TOTAL COSTS TO WATER DISTRICT 12-A FOR THE IRRIGATION SEASON OF 1942	\$ 7336.66

CONCLUSIONS

1. That an Advisory Committee with authority to represent the Water-Users and to advise with the Watermaster is very beneficial and helpful and should be continued.
2. That the records and data as compiled in the Watermaster's reports for more than twenty-five years should be continued.
3. That the River naturally divides itself into three sections during the low-water period.
4. That the River can be completely dried up at the lower end of Section I without injury to the rights in Section II during the low-water period of each irrigation year.
5. That the return flow is a vital factor and must be considered in the operation of the River.
6. That all tributary streams should be considered as a part of the available water supply of the Boise River.

7. That the transfer of water rights from Section II to Section I is injurious to the rights already existing in Section I and should not be permitted.
8. That the construction of drainage systems in the Boise Valley has changed the irrigation requirements within these districts.
9. That by reason of the construction of these drainage canals certain waters which were formerly lost through seepage, evaporation and deep percolation, or reached the River during the Winter months, are probably now reaching the River during the irrigation season and made available for irrigation purposes.
10. That the question of watershed protection is of vital importance to the water users of the Boise Valley.
11. That a reasonable program of research work should be continued by the U.S. Forest Service on the Boise River Watershed for the purpose of determining to what extent the resources of the watershed may be utilized without being injurious to the inherent rights of the Water-Users who are dependent upon this resource for a livelihood.
12. That the knowledge and data upon which a permanent duty of water must necessarily be based are constantly being improved and increased.
13. That an arbitrary duty of water, if established, should be subject to change from time to time.
14. That the temporary "Court Orders" under which the Boise River has been operated for more than 20 years have proven very satisfactory to the Boise Valley as a whole.
15. That approximately two-thirds of the entire Boise Valley is badly in need of supplemental water.
16. That mining operations within the bed of the Boise River and its tributaries should not be permitted.

GRAND TOTAL

This acreage is based, in some instances, upon actual surveys and in other cases upon the acreage as determined at the time of the Stewart Decree and is the best information available at the present time. (February 14, 1941)

Ridenbaugh represents old lands within the Nampa and Meridian Irrigation District that are watered by the old Ridenbaugh water rights in the Stewart Decree. The balance of the Nampa and Meridian Irrigation District lands are included under the Board of Control.

Chart No. 15

INNING 1916

Chart 16.

CHART SHOWING HEADGATE DUTY OF WATER
IN MINERS INCHES PER ACRE FOR 18 BOISE
VALLEY CANALS.

— Average For Four High Years, 1921-23-25-27.
- - - Average For Three Low Years 1924-26-31.
.... Average For Sixteen Year Period 1916-31 inclusive.

TOTAL MONTHLY DIVERSIONS IN ACRE FEET, OF
CANALS IN DRAINAGE DISTRICT NO. 2 FOR 29,000

IRRIGATION SEASON OF 1942
