**RE: EVIDENCE OF PRIORITY FOR SRBA WATER RIGHT CLAIM 21-10973**

Dear Claimant (s):

The Idaho Department of Water Resources is nearing the beginning of water rights review in Basin 21, the Henry's Fork drainage. The Notice(s) of Claim identified with the number shown above has been filed in the Snake River Basin Adjudication (SRBA). The Notice of Claim indicates water usage is based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Claim. The date the water was first put to beneficial use, known as the priority date, has not been confirmed by License, Decree, or Permit. For this reason, proof must be provided supporting the priority date. **As the claimant, you are responsible for submitting the necessary proof to support the priority date.**

***Your claim, as referenced above, claims a Priority Date of JUN 01 1892, from HENRYS FORK.***

It is important that each element of the Notice of Claim be verified. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

For your reference, I have provided a printout of your Notice of Claim and the pamphlet entitled "**Evidence of Priority**". The pamphlet describes the types of evidence which are acceptable and suggests which documents will fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled "**What Kind of Evidence is Required**" and "**Some Examples of Documents Which May Be Evidence of the Priority Date**". **PLEASE READ THE ENCLOSED PAMPHLET.**

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other elements of the Notice of Claim have been or soon will be conducted by Department personnel.

**SCANNED**

**DEC 10 2004**

**PROFILED**

.....  
**The Department will not recommend the Notice of Claim be decreed by the court if  
evidence of a priority date is not submitted. The Notice of Claim will be disallowed.**  
.....

Please submit documentation supporting the priority date as soon as possible,  
referencing all documents with the corresponding claim number.

Respectfully submitted,

*Ernest Carlson*

Affidavit of Reed Oldham

Re: Winter water use from the Consolidated Farmers Canal.

My name is Reed Oldham. I am a retired farmer, former President of the Consolidated Farmers Canal, former member of the Committee of Nine, and have been involved in water management all of my life. I reside at 1670 West 3000 North Rexburg, Idaho 83440. I have lived within one-half mile of my present residence all of my life. I was born in 1914 across the street from my present home, in my grandfather Phost's home. My grandfather homesteaded his farm, and was instrumental in the construction of the canal on the south side of the Teton River to his property. My mother was born on this farm in 1891, so I am confident that the canal water was used in the winter prior to that date.

Before the Consolidated Farmers Canal (CFC) was constructed, my grandfather watered his stock from the slough south of his barn fed from the Teton river. After the construction of the CFC the slough was fed during the entire year from the canal and provided water for livestock and kept the water table high enough for everyone in the area to get their culinary water from shallow wells using sandpoints and hand pumps. Without the water in the canal and ditches, these shallow wells would dry up.

In addition to the sloughs, the lateral ditches were fed from the canal to supply water to those living in the western and southern part of our community. I remember as a small boy, ice skating on the large ditch behind our house that ran from the CFC to the Saurey property and the Rigby property two miles west of our farm. They used this water for cattle and to recharge the shallow water table. Many times the headgate would freeze up and we would have to chop ice or plug the gate with straw to stop flooding in our field.

Having been involved in the management of the CFC, I believe that it will take in excess of 80 cfs to get water to the end of the canal, considering small diversions for stock water and transmission loss in the canal.

It is my testimony that water from the Consolidated Farmers Canal was used during the winter months for purposes of stock water and groundwater recharge from the time the canal was constructed and a decree was issued in 1890.
